**The Changing Landscape of Spanish Language Curricula** Alan V. Brown, Gregory L. Thompson, 2018-07-01 Spanish remains a large and constant fixture in the foreign language learning landscape in the United States. As Spanish language study has grown, so too has the diversity of students and contexts of use, placing the field in the midst of a curricular identity crisis. Spanish has become a second rather than a foreign language in the US, which leads to unique opportunities and challenges for curriculum and syllabus design, materials development, individual and program assessment, and classroom pedagogy. In their book, Brown and Thompson address these challenges and provide a vision of Spanish language education for the twenty-first century. Using data from the College Board ETS and the authors' own institutions, as well as responses to their national survey of almost seven hundred Spanish language educators, the authors argue that the field needs to evolve to reflect changes in the sociocultural, socioeducational, and sociopolitical landscape of the US. The authors provide a coherent and compelling discussion of the most pressing issues facing Spanish post-secondary education and strategies for converting these challenges into opportunities. Topics addressed in the book include Heritage learners, service learning in Spanish-speaking communities, Spanish for specific purposes, assessment, unique needs for Spanish teacher training, online and hybrid teaching, and the relevance of ACTFL's national standards for Spanish post-secondary education. An essential read for Spanish language scholars, especially those interested in curriculum design and pedagogy that includes supporting reflection, questions, and pedagogical activities for use in upper-level undergraduate and graduate-level courses.

**Applications of Computational Intelligence** Alvaro David Orjuela-Cañón, Jesus A. Lopez, Oscar J. Suarez, 2025-04-30 This book, CCIS 2212, constitutes the referred proceedings of the 7th IEEE Colombian Conference on Applications of Computational Intelligence, ColCACI 2024, held in Pamplona, Colombia, during July 17-19, 2024. The 11 full papers were carefully reviewed and selected from 35 submissions. They explore various topics in the area of computational intelligence (CI), such as solar and photovoltaic forecasting, microseismic signal analysis, LLM performance analysis, evolution in translation systems, recognition of actors, and peacebuilding control in autonomous vehicles, and electroencephalography signals analysis.

**The Routledge Handbook of Hispanic Applied Linguistics** Manel Lacorte, 2014-09-19 This book provides a comprehensive overview of Hispanic applied linguistics, allowing students to understand the field from a variety of perspectives and offering insight into the ever-growing number of professional opportunities afforded to Spanish language program graduates. The goal of this book is to re-contextualize the notion of applied linguistics as simply the application of theoretical linguistic concepts to practical settings and to consider it as its own field that addresses language-based issues and problems in a real-world context. The book is organized into five parts: 1) perspectives on learning Spanish, 2) issues and environments in Spanish teaching, 3) Spanish in the professions, 4) the discourses of Spanish, and 5) social and political contexts for Spanish. The book's all-inclusive coverage gives students the theoretical and sociocultural context for study in Hispanic
