Throwing Rocks At The Google Bus:

Throwing Rocks at the Google Bus Douglas Rushkoff, 2016 Why doesn't the explosive growth of companies like Facebook and Uber deliver more prosperity for everyone? What is the systemic problem that sets the rich against the poor and the technologists against everybody else? When protesters shattered the windows of a bus carrying Google employees to work, their anger may have been justifiable but it was misdirected. The true conflict of our age isn't between the unemployed and the digital elite or even the 99 percent and the 1 percent. Rather, a tornado of technological improvements has spun our economic program out of control and humanity as a whole, the protesters and the Google employees as well as the shareholders and the executives, are all trapped by the consequences. It's time to optimize our economy for the human beings it's supposed to be serving. In this groundbreaking book, acclaimed media scholar and author Douglas Rushkoff tells us how to combine the best of human nature with the best of modern technology. Tying together disparate threads—big data, the rise of robots and AI, the increasing participation of algorithms in stock market trading, the gig economy, the collapse of the eurozone—Rushkoff provides a critical vocabulary for our economic moment and a nuanced portrait of humans and commerce at a critical crossroads.

Coding Democracy Maureen Webb, 2021-07-27 Hackers as vital disruptors inspiring a new wave of activism in which ordinary citizens take back democracy Hackers have a bad reputation as shady deployers of bots and destroyers of infrastructure In Coding Democracy Maureen Webb offers another view Hackers she argues can be vital disruptors Hacking is becoming a practice an ethos and a metaphor for a new wave of activism in which ordinary citizens are inventing new forms of distributed decentralized democracy for a digital era Confronted with concentrations of power mass surveillance and authoritarianism enabled by new technology the hacking movement is trying to build out democracy into cyberspace

Recapture the Rapture Jamie Wheal, 2021-04-27 A highly personal richly informed and culturally wide ranging meditation on the loss of meaning in our times and on pathways to rediscovering it Gabor Mat MD author of In The Realm of Hungry Ghosts Close Encounters With Addiction A neuroanthropologist maps out a revolutionary new practice Hedonic Engineering that combines the best of neuroscience and optimal psychology It's an intensive program of breathing movement and sexuality that mends trauma heightens inspiration and tightens connections helping us wake up grow up and show up for a world that needs us all This is a book about a big idea And the idea is this Slowly over the past few decades and now suddenly all at once we're suffering from a collapse in Meaning Fundamentalism and nihilism are filling that vacuum with consequences that affect us all In a world that needs us at our best diseases of despair tribalism and disaster fatigue are leaving us at our worst It's vital that we regain control of the stories we're telling because they are shaping the future we're creating To do that we have to remember our deepest inspiration heal our pain and apathy and connect to each other like never before If we can do that we've got a shot at solving the big problems we face And if we can't Well the dustbin of history has swallowed civilizations older and fancier than ours This book is divided into three parts The first Choose Your Own Apocalypse takes a look at our current Meaning Crisis where we are today why it's so hard to make sense of the world what might be coming next and what to do about it It also makes a case that many of our efforts to cope whether anxiety and denial or tribalism and identity politics are likely making things worse The middle section The Alchemist Cookbook applies the creative firm IDEO's design thinking to the Meaning Crisis This is where the book gets hands on taking a look at the strongest evolutionary drivers that can bring about inspiration healing and connection From breathing to movement sexuality music and substances these are the everyday tools to help us wake up grow up and show up AKA how to blow yourself sky high with household materials And the best part They're accessible by anyone anywhere no middleman required

Transcendence democratized The final third of the book Ethical Cult Building focuses on the tricky nature of putting these kinds of experiences into gear and into culture because anytime in the past when we've figured out combinations of peak states and deep healing we've almost always ended up with problematic culty communities Playing with fire has left a lot of people burned This section lays out a roadmap for sparking a thousand fires around the world each one unique and tailored to the needs and values of its participants Think of it as an open source toolkit for building ethical culture In Recapture the Rapture we're taking radical research out of the extremes and applying it to the mainstream to the broader social problem of healing believing and belonging It's providing answers to the questions we face how to replace blind faith with direct experience how to move from broken to whole and how to cure isolation with connection Said even more plainly it shows us how to revitalize our bodies boost our creativity rekindle our relationships and answer once and for all the questions of why we are here and what do we do now In a world that needs the best of us from the rest of us this is a book that shows us how to get it done
