Tides of History Michael S. Reidy, 2009-10-15 In the first half of the nineteenth century the British sought to master the physical properties of the oceans in the second half they lorded over large portions of the oceans outer rim The dominance of Her Majesty's navy was due in no small part to collaboration between the British Admiralty the maritime community and the scientific elite Together they transformed the vast emptiness of the ocean into an ordered and bounded grid In the process the modern scientist emerged Science itself expanded from a limited and local undertaking receiving parsimonious state support to worldwide and relatively well financed research involving a hierarchy of practitioners Analyzing the economic political social and scientific changes on which the British sailed to power *Tides of History* shows how the British Admiralty collaborated closely not only with scholars such as William Whewell but also with the maritime community sailors local tide table makers dockyard officials and harbormasters in order to systematize knowledge of the world's oceans coasts ports and estuaries As Michael S Reidy points out Britain's security and prosperity as a maritime nation depended on its ability to maneuver through the oceans and dominate coasts and channels The practice of science and the rise of the scientist became inextricably linked to the process of European expansion

[The Philosophical Breakfast Club](#) Laura J. Snyder, 2012-01-17 A fascinating book about the way four geniuses at Cambridge University revolutionized modern science Newsweek The Philosophical Breakfast Club recounts the life and work of four men who met as students at Cambridge University Charles Babbage John Herschel William Whewell and Richard Jones Recognizing that they shared a love of science as well as good food and drink they began to meet on Sunday mornings to talk about the state of science in Britain and the world at large Inspired by the great 17th century scientific reformer and political figure Francis Bacon another former student of Cambridge the Philosophical Breakfast Club plotted to bring about a new scientific revolution And to a remarkable extent they succeeded even in ways they never intended Historian of science and philosopher Laura J Snyder exposes the political passions religious impulses friendships rivalries and love of knowledge and power that drove these extraordinary men Whewell who not only invented the word scientist but also founded the fields of crystallography mathematical economics and the science of tides Babbage a mathematical genius who invented the modern computer Herschel who mapped the skies of the Southern Hemisphere and contributed to the invention of photography and Jones a curate who shaped the science of economics were at the vanguard of the modernization of science This absorbing narrative of people science and ideas chronicles the intellectual revolution inaugurated by these men one that continues to mold our understanding of the world around us and of our place within it Drawing upon the voluminous correspondence between the four men over the fifty years of their work Laura J Snyder shows how friendship worked to spur the men on to greater accomplishments and how it enabled them to transform science and

help create the modern world The lives and works of these men come across as fit for Masterpiece Theatre Wall Street Journal Snyder succeeds famously in evoking the excitement variety and wide open sense of possibility of the scientific life in 19th century Britain splendidly evoked in this engaging book American Scientist This fine book is as wide ranging and anecdotal as excited and exciting as those long ago Sunday morning conversations at Cambridge The Philosophical Breakfast Club forms a natural successor to Jenny Uglow s The Lunar Men and Richard Holmes s The Age of Wonder Washington Post

The Cultural History of the South China Sea Shangji SiTu,2019-04-30 As the cradle of the ancient Maritime Silk Road the South China Sea plays an important role in the history of civilization Since the South China Sea opened to the outside world as a commercial port in 111 BC it has experienced ups and downs With dynasties changing over time the Chinese South China Sea has undergone dramatic changes and experienced rises and falls along with the economic and cultural development of the Maritime Silk Road It is still one of the most active and dynamic regions across China and even the whole world This book reviews the history and analyzes the current situation and bright future of the South China Sea In this book the social economic and cultural synthesis in the South China Sea is examined as well as trade and cultural communications The scope of the book centers around economic trade and cultural development which is the starting point and main theme A History of European Thought in the Nineteenth Century: Scientific thought, 2 v John Theodore Merz,1907 **The natural history and scientific book circular** Wesley William and son,1891 **Earth Sciences History** ,2003 Journal for the History of Astronomy ,2000 A History of Scientific Ideas Charles Singer,1996 In this book Charles Singer presents a history of science covering the developments protagonists and philosophy behind science from the Stone Age to the 20th century **The Ocean Atmosphere and Life.
