Regazzoni, Gianni Fabri, Gianni Vernazza, 1998-11-30 *Advanced Video Based Surveillance Systems* presents second generation surveillance systems that automatically process large sets of signals for performance monitoring tasks Included is coverage of different architecture designs customization of surveillance architecture for end users advances in the processing of imaging sequences security systems sensors and remote monitoring projects Examples are provided of surveillance applications in highway traffic control subway stations wireless communications and other areas This work will be of interest to researchers in image processing computer vision digital signal processing and telecommunications

**Machine Intelligence and Knowledge Engineering for Robotic Applications** Andrew K.C. Wong, Alan Pugh, 2012-12-06 This book is the outcome of the NATO Advanced Research Workshop on Machine Intelligence and Knowledge Engineering for Robotic Applications held at Maratea Italy in May 1986 Attendance of the workshop was by invitation only Most of the participants and speakers are recognized leaders in the field representing industry government and academic community worldwide The focus of the workshop was to review the recent advances of machine intelligence and knowledge engineering for robotic applications It covers five main areas of interest They are grouped into five sections 1 Robot Vision 2 Knowledge Representation and Image Understanding 3 Robot Control and Inference Systems 4 Task Planning and Expert Systems 5 Software Hardware Systems Also included in this book are a paper from the Poster Session and a brief report of the panel discussion on the Future Direction in Knowledge Based Robotics Section I of this book consists of four papers It begins with a review of the basic concepts of computer vision with emphasis on techniques specific for robot vision systems The next paper presents a comprehensive 3 D vision system for robotic application

**Computer Analysis of Images and Patterns** Dmitry Chetverikov, Walter Kropatsch, 1993-08-30 This volume constitutes the proceedings of the 5th

International Conference on Computer Analysis of Images and Patterns CAIP 93 held in Budapest Hungary in September 1993 Formerly the events in this biennial conference series were thought as a forum where East European researchers and professionals from academia and industry had an opportunity to discuss their results and ideas with Western colleagues active in image processing and pattern recognition Now CAIP 93 has a much more international scope and in the future these conferences will not any longertake place only in East European countries but roam throughout whole Europe Besides invited talks by Belikova Gimel farb Haralick and Roska the volume contains 114 contributions either presented as lectures or posters and carefully selected by a highly competent international program committee from a total of some 230 submissions thus the book gives a thorough survey on recent research results and their applications in image processing and pattern recognition The proceedings is organized in 20 sections for example on image data structures image processing edges and contours Hough transforms and related methods shape motion 3 D vision character recognition and document processing biomedical applications industrial applications and neural networks *Multisensor Fusion* Anthony K. Hyder,E.

Shahbazian,E. Waltz,2012-12-06 For some time all branches of the military have used a wide range of sensors to provide data for many purposes including surveillance reconnoitring target detection and battle damage assessment Many nations have also attempted to utilise these sensors for civilian applications such as crop monitoring agricultural disease tracking environmental diagnostics cartography ocean temperature profiling urban planning and the characterisation of the Ozone Hole above Antarctica The recent convergence of several important technologies has made possible new advanced high performance sensor based applications relying on the near simultaneous fusion of data from an ensemble of different types of sensors The book examines the underlying principles of sensor operation and data fusion the techniques and technologies that enable the process including the operation of fusion engines Fundamental theory and the enabling technologies of data fusion are presented in a systematic and accessible manner Applications are discussed in the areas of medicine meteorology BDA and targeting transportation cartography the environment agriculture and manufacturing and process control **Color**

**Image Processing** Rastislav Lukac,Konstantinos N. Plataniotis,2018-10-03 Color Image Processing Methods and Applications embraces two decades of extraordinary growth in the technologies and applications for color image processing The book offers comprehensive coverage of state of the art systems processing techniques and emerging applications of digital color imaging To elucidate the significant progress in specialized areas the editors invited renowned authorities to address specific research challenges and recent trends in their area of expertise The book begins by focusing on color fundamentals including color management gamut mapping and color constancy The remaining chapters detail the latest techniques and approaches to contemporary and traditional color image processing and analysis for a broad spectrum of sophisticated applications including Vector and semantic processing Secure imaging Object recognition and feature detection Facial and retinal image analysis Digital camera image processing Spectral and superresolution imaging Image and

video colorization Virtual restoration of artwork Video shot segmentation and surveillance Color Image Processing Methods and Applications is a versatile resource that can be used as a graduate textbook or as stand alone reference for the design and the implementation of various image and video processing tasks for cutting edge applications This book is part of the Digital Imaging and Computer Vision series *Image Algebra and Morphological Image Processing*, 1991 **Image Algebra and Morphological Image Processing II** Paul D.
