Timeless Oxford Studies Analytic Theology Ebook:

Jonathan Edwards' Concerning The End for Which God Created the World Walter J. Schultz, 2020-01-20 This book is an exposition of Jonathan Edwards' argumentation in his dissertation *Concerning the End for Which God Created the World*. In addition to stating Edwards' theses regarding God's end and motivation in creation, this book identifies and discusses the assumptions of his argumentation, analyses and explains its crucial components, and explores its philosophical implications. These implications include a version of exemplarism, i.e., the nature of God's ideas for creation; dispositionalism, i.e., the characteristics of God which explain God's motivation and emanationism, i.e., what God shares of himself with persons who have a living faith in Christ. These entail a view of idealism, i.e., a view of the ultimate ontological ground of the universe; God's temporal nature; continuous creationism, i.e., how God sustains creation; a version of panentheism, i.e., how God who is infinite is related to creation from which God is absolutely distinct; and occasionalism, i.e., the nature of causation of physical events or states of creation. These concepts and what they entail constitute a complete metaphysical system providing a thoroughgoing divine action understanding of the foundation of reality. For Jonathan Edwards, God's acting according to his plans for his purposes in Christ is fundamental to all things. Were we to have an understanding of how the fundamental concepts of science, mathematics, and ordinary experience are related in reality to the God who acts for his original ultimate end in creation, sustaining the universe while providentially guiding its affairs and working redemption, we would have the opportunity to develop these as he had hoped he pointed the way for others to follow. *Oxford Studies in Historical Theology*, Professor of Historical Theology Richard A. Muller (Emeritus Calvin Theological Seminary), 2021. [An Invitation to Analytic Christian Theology](#) Thomas H. McCall, 2015-11-09 Analytic theology is a new and stimulating movement that uses the tools and methods of philosophy to help us understand and articulate Christian doctrine. Thomas McCall introduces us to analytic theology, explaining its connections to Scripture, Christian tradition, and culture, and calling the discipline to deeper engagement with the traditional resources of the theological task. [Analyzing Doctrine](#) Oliver Crisp, 2019 In *Analyzing Doctrine*, Oliver Crisp carefully considers the relationship of systematic theology to analytic philosophy, arguing that the tools of analytic philosophy can be fruitfully applied to traditional systematic theology. Doing so, as *Analyzing Doctrine* reveals, creates a distinct and rich analytic theology. *Analyzing Doctrine* employs traditional themes of systematic theology to structure Crisp's analytic theological analysis. Crisp examines the doctrine of God, the mystery of the Trinity, and God's intention in creating and relating to the world. He then addresses the incarnation, original sin, the virgin birth, Christ's two wills, salvation, and finally the resurrection. In the process of making his constructive case, Crisp engages a range of historic theological voices from the tradition as well as contemporary biblical studies and systematic theology. Clear, accessible, and engaging, *Analyzing Doctrine* establishes analytic theology's place in the architecture of systematic theology while also challenging some of its misconceptions. By seamlessly weaving together Christian tradition and analytic philosophy to

construct his theology Crisp argues for the integral role that analytic theology plays in the theological imagination
