change the past Summary If you live in a world where time travel secrets are only found in forbidden technologies Alex finds a hidden time machine that their grandfather left behind Alex has a strong desire to make the world a better place Alex goes on a secret trip that takes him through historical rooms and to the heart of what it means to really change the world The fact that time travel is illegal doesn t stop Alex and his friends from traveling through time Alex believes that good change is possible When Alex starts this trip he is surrounded by a wide range of experiences that cover all of human life Alex s journeys take him through a wide range of situations that teach him important lessons about being brave having empathy and how small actions can have big effects These talks which are full of old wisdom show Alex that history is more than just a collection of events it s a tapestry made from the important threads of many people s lives But there are risks on the way When Alex breaks the rule about time travel the time police step in and cause a dramatic escape that shows how dangerous it is to mess with time After a close call with the police Alex has to think about what might happen if they do something not just in history but also in their own lives Even with these problems Alex manages to make relationships that last These exchanges especially the ones between a group of active kids and an older wiser person show how important it is to live in the present Alex comes to a deep understanding at the end of his journey through time the most important changes are those that start inside and spread out to affect the present and the future Alex decides to put the time machine away and use what they ve learned from their trips to change things in the present The movie The Last Time Traveler shows that the human spirit can still make things better We can t change the past but the choices and acts we make today can help make the future better Alex s journey from finding the banned time machine to becoming a beacon of hope in his own time shows this well Every moment in this book is a gift and the emotional trip is where time travel really starts and ends Chapter 1 Device Not Allowed Alex was a curious kid who lived in an old creaky house that was full of memories and secrets This land was owned by their grandfather a bright but mysterious scientist known for his big ideas and inventions Among the many stories being told around the house Alex was most interested in one about a machine that wasn t supposed to be there It was said that this technology could take you back in time which is not possible Alex were always looking into every part of the house because they were very curious and heard that their grandfather was very smart However Alex was drawn to the attic because it seemed mysterious and had lots of hidden things Alex noticed something strange one day when sunshine came in through the dirty windows and cast shadows on the old books and trunks They were amazed by this machine because it was so big quiet and well designed and it was covered in dust This was the grandfather s illegal time machine which he built himself Alex had a strong response when he saw time travel even though it was against the law and not a good idea There was a doorway that led to the past to places and times that are only described in books It was impossible to say no to the chance to be with stars and legends and watch history happen Alex felt both excited and scared in his heart They had heard stories about how dangerous time travel could be and what would happen if you changed the course of history even a little But there was a

great desire to see understand and maybe even make up for mistakes that had been made in the past People could visit ancient communities see the natural wonders of the world before their time and maybe even change the world with this invention But this technology was more than just a look into the past it showed them what their grandfather stood for and what he wanted to achieve He thought that learning about the past would help us make the present better When Alex saw the machine he felt like they knew their grandpa even though they had never met him It looked like his spirit was telling Alex to go on this trip and finish the goal he hadn t been able to finish before this amazing invention With new determination Alex started to clean the machine With each stroke of the brush more of its complicated design became visible They were amazed by how complicated it was and by the buttons and gears that could unlock the secrets of time Alex thought that every touch brought them closer to their grandfather his past and the goal he was trying to follow but couldn t It was a tough choice to go into the unknown and break the rules that say time travel can only happen in stories and your fantasy Alex knew how important their choice was and what might happen if they messed with time Even so the allure of finding and adventure stayed strong People who were brave who dared to dream big and who looked for the truths buried beneath the layers of history were told this As Alex got ready to turn on the machine his mind was filled with fear shock and awe They planned to go on trips to places that only existed in stories walking in the footsteps of famous people and standing where tales used to stand The idea was both interesting and scary With a calm hand and a deep breath Alex turned the knobs Their hearts were racing The machine turned on with a soft hum and energy that couldn t be seen shimmered in the air At that very moment Alex knew that their lives were about to change in a big way They were going into the unknown with only their interest and the hope that they could make a small difference After that he would go on an amazing trip that would take him through time and into the heart of what it means to change the world and follow a forbidden but strong desire Their grandpa left this to them as a message from the past to the future It told Alex to think about things beyond their own time to learn to grow and maybe even to change the course of history Alex got into the machine with the faith of someone who thinks the impossible is possible He was ready to face the struggles and secrets of the past to find out what the stories were really about and to continue a legacy of bravery curiosity and hope Chapter 2 Making a Choice That night Alex lay in bed with his eyes wide open and stared at the ceiling Through the window a soft moonlight came in Finding the time machine made people think and feel a lot of different things It was like having the key to a door that wasn t locked which meant that many things could happen But this key had a lot of weight when it came to making decisions On the one hand technology let people have amazing adventures and see important historical events for themselves But it was a dangerous trip that put not only them but also time itself at risk Alex had a lot of questions and what if s going through his mind Imagine seeing people and events from history that they had only read about in books How would it feel to walk through the streets of old towns while hearing people speak old languages But there was also a feeling of worry mixed in with the excitement about these ideas Going back

in time wasn't easy. Every choice that was made in the past can have a big effect on the present. The limit on time travel was put in place to stop the chaos that could happen when unexpected things happened. Alex made the choice though for a reason stronger than her desire for excitement and fear of the unknown. The equipment was made by their grandfather with a specific goal in mind. He thought that knowing about the past could have an effect on the present and the future rather than just being a record of what happened. Alex really liked this idea because he wanted to see the world through their grandfather's eyes and know what he thought and wanted. This longing was what finally made the difference. Alex played around with their ideas all night thinking about each one from every angle. They are responsible for a lot since they have so much power. But as the room filled with the first light of dawn things became clearer. Of course there were risks but there was also the chance to learn, grow, and maybe even make a small change in the big picture. Alex made the choice and the early morning light made their promise look even stronger. They wouldn't go into the time machine without thinking but because they were curious and thought good things could still happen. They didn't just jump into the unknown, they planned to do this because they wanted to learn more about their grandfather's background and find out what it could teach them. As Alex got ready for their first trip, he felt less excited about the choice because it was so important. They knew how important their goal was. With each turn of the knobs and looking at how it worked, Alex reaffirmed their dedication to this course. They knew that the trip would be important for them and that it would also help them understand the past and how it affects the present so they were both humble and excited about leaving. It wasn't just a choice to use the time machine, it was a promise to carefully look through history, learn from the past, and share what you've learned with people in the present. It was a promise to follow their grandfather's rules and treat all events in history with respect and kindness. When Alex made this choice, they took on a much bigger role than themselves. They became a link between the past and the future, as well as between the hopes and dreams of the next generation. Alex stood in front of the time machine on this calm morning, ready to start the adventure of a lifetime. They carried with them not only the thrill of discovery but also the promise to make this journey significant. They knew that time travel was hard, that history was in danger, and that what people do has effects. Alex got on the time machine with this new information and a strong desire to make things different. They were ready to face the past, learn from it, and maybe even change the course of events in their own small way. This choice, which was both unknown and full of possibilities, was the start of a wonderful journey that would push the limits of what we knew and study the endless options that existed where space and time met.
