worry that the two best teams in the country aren't consistently selected by the polls and the BCS computers to play for the National Championship. At stake is prestige, a place in history, recruiting advantages and boatloads of cash. The solution proposed most often is a playoff system to give more schools a shot at a title. However, the problem of team selection won't go away with a playoff system; it will be exacerbated. The lack of a credible ranking system is the Achilles heel of the current BCS system. Cinderella's Slipper reveals why the polls get it wrong, why the BCS computers can't be expected to get it right, why traditional statistics aren't useful for ranking teams, and why won-lost records are misleading. Cinderella's Slipper introduces the performance metrics necessary for team ranking and explains the rating system that can accurately rank teams with similar records. When combined with NCAA sponsorship and an accurate ranking system, a playoff scheme will produce deserving champions and will restore public confidence in the college football National Championship process. Baseball and Philosophy brings together two high-powered pastimes: the sport of baseball and the academic discipline of philosophy. Eric Bronson asked eighteen young professors to provide their profound analysis of some aspect of baseball. The result offers surprisingly deep insights into this most American of games. The contributors include many of the leading voices in the burgeoning new field of philosophy of sport, plus a few other talented philosophers with a personal interest in baseball. A few of the contributors are also drawn from academic areas outside philosophy: statistics, law, and history. This volume gives the thoughtful baseball fan substantial material to think more deeply about. What moral issues are raised by the Intentional Walk? Do teams sometimes benefit from the self-interested behavior of their individual members? How can Zen be applied to hitting? Is it ethical to employ deception in sports? Can a game be defined by its written rules, or are there also other constraints? What can the U.S. Supreme Court learn from umpiring? Why should baseball be the only industry exempt from antitrust laws? What part does luck play in any game of skill? *Baseball America*
