

on the bed and through one of the holes in the left side of the bobbin 4 from the inside.

Fig. 9. Winding the Bobbin

Hold end of the thread and press the foot controller pedal as for sewing.

End of thread must be held until it breaks off.

Allow tension discs to control flow of thread so that it winds on the bobbin in uniform, level rows.

Stop winding the thread just before it reaches the rim of the bobbin. Pull the bobbin winder away from the belt. Remove the bobbin from the spindle.

Tighten knurled screw B.

If bobbin does not wind evenly, loosen screw which holds bobbin winder tension bracket 3, Fig. 9 in position. Move bracket to the left if bobbin winds high on the right; move bracket to the right if bobbin winds high on the left. When bracket is properly centered, thread will wind evenly across bobbin. Tighten tension bracket screw.
