and women developed and expanded Singer's selling system to the extent that the multinational company was seen as domestic both in the location sense and because of its focus on the private sphere of the home. By bringing the cases of Spain and Mexico and the cultural everyday realm of practices related to sewing and embroidery that the sewing machine was part of to the center of the study of international business Gendered Capitalism further reveals the layers of complexities and multitudes that conform the history of global capitalism. This book will be of interest to readers and scholars in the fields of business history, economic cultural history, management studies, international business, women's history, gender studies and the history of technology.
