from older anatomical collections 2 Substitution of the Suchey Brooks method for the Gilbert McKern method for age determination by pubic symphysis maturation especially because the former appears to be more accurate for females 3 Inclusion of age estimates for males and females by sternal rib metamorphosis which allows estimates to be made on individuals older than allowed for by pubic symphysis maturation These and other additions including new corrections for age in estimating stature in older adults makes this second edition much more useful during human identification A *Guide to Expert Systems* Donald Arthur Waterman, 1986 A boy his grandparents live near a cursed wood the boy longs for a dog but the ungainly creature found by his grandfather hardly fits his image of the perfect pet But then the dog starts to grow human ears Radiation Exposure of Uranium Miners: Additional backup and reference material to the hearings held May 9, 10, 23, June 6, 7, 8, 9, July 26, 27, and August 8 and 10, 1967 United States.
