

This service manual contains detailed descriptions of all the typical repair and servicing procedures for this power tool.

All the design concept of models MGS 2900, MGS 3110 and MGS 3300 is almost identical. The descriptions and servicing procedures in this manual generally apply to all three models. Differences are described in detail.

You should make use of the illustrated parts lists when carrying out repair work. They show the individual positions of the individual components and assemblies.

Please to the latest edition of the relevant parts list to check the part numbers of any replacement parts.

A fault on the machine may have several causes. To help locate the fault, consult the chapter on "Troubleshooting" and the STIHL Service Training System.

Please to the "Technical Information" bulletins for engineering changes which have been introduced since publication of this service manual. Technical Information bulletins also incorporate the parts list until an updated edition is issued.

The special tools mentioned in the descriptions are listed in chapter "Special Servicing Tools" of this manual. Use the part numbers to identify the tools in the STIHL "Special Tools" manual which lists all the special servicing tools currently available from STIHL.

Symbols are included in the text and pictures for greater clarity. The meanings are as follows:

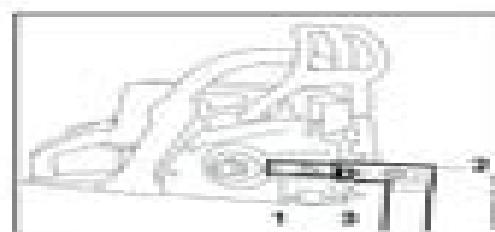

In the descriptions:

- = Action to be taken is shown in the illustration (above the text)
- = Action to be taken that is not shown in the illustration (above the text)

In the illustrations:

- = Pointer (short arrow)
- = Direction of movement (long arrow)
- → = Reference to another chapter, i.e. Chapter 4.2 in this example.

Service manual and technical information bulletins are intended exclusively for the use of properly equipped repair shops. They must not be passed to third parties.

Service and repair are made considerably easier if the clamping (1) M8 x 250 2000 is used to mount the machine on assembly stand (2). M8 x 250 3 000 are used for clamping major components like outer 10 mm holes (3) in the assembly stand.

To service the underside of the machine, turn it upside down and mount it so that one clamp screw engages the lower 10 mm hole in the assembly stand.

Notes:

Pull the hand guard back, separate the hand guard for this purpose.

Always use original STIHL replacement parts.

They can be identified by the STIHL part number.

The **STIHL** logo and the STIHL parts symbol **■**. This symbol may appear alone on small parts.
