Learn how to add scripts to a web page, store and manipulate information, communicate with the browser window, respond to events like mouse clicks and form submissions, and identify and modify HTML. Get real world examples of JavaScript in action. Learn to build pop-up navigation bars, enhance HTML tables, create an interactive photo gallery, and make web forms more usable. Create interesting user interfaces with tabbed panels, accordion panels, and pop up dialog boxes. Learn to avoid the ten most common errors new programmers make and how to find and fix bugs.
