*RecFlix: an Android-based Recommendation & Retrieval System for Netflix* Kaniz Fatema,California State University, Sacramento,2012 Widespread adoption of high speed internet connectivity makes streaming media a reality and these days many streaming devices are increasingly becoming available including smart TVs internet connected Blu ray players Apple TV and so on One problem users quickly face is the navigation and search of titles The current approach is far from satisfactory Since smartphones are everywhere these days can smartphones help with this discovery problem In this project we develop an Android based app for Netflix a movie rental and streaming system to address this problem One of the nice aspects of Netflix is that it offers recommendations However it is tailored to one account which is often shared by all of

the family members Therefore it is hard to differentiate the recommendations for the parents vs the teenage members of a family The app we develop does not require a user to login and the recommendations are tailored to the owner of the smartphone only Our proposed recommendation algorithm is based on the ratings available on Netflix and Rotten Tomatoes but can also incorporate new data sources We conduct a limited study and based on the feedback of the subjects the result is promising  **Password and Username Keeper** Login Keeper,2020-02-09 This notebook collects all your login information
