*GPU Programming in MATLAB* Nikolaos Ploskas,Nikolaos Samaras,2016-08-25 GPU programming in MATLAB is intended for scientists engineers or students who develop or maintain applications in MATLAB and would like to accelerate their codes using GPU programming without losing the many benefits of MATLAB The book starts with coverage of the Parallel Computing Toolbox and other MATLAB toolboxes for GPU computing which allow applications to be ported straightforwardly onto GPUs without extensive knowledge of GPU programming The next part covers built in GPU enabled features of MATLAB including options to leverage GPUs across multicore or different computer systems Finally advanced material includes CUDA code in MATLAB and optimizing existing GPU applications Throughout the book examples and source codes illustrate every concept so that readers can immediately apply them to their own development Provides in depth comprehensive coverage of GPUs with MATLAB including the parallel computing toolbox and built in features for other MATLAB toolboxes Explains how to accelerate computationally heavy applications in MATLAB without the need to re write them in another language Presents case studies illustrating key concepts across multiple fields Includes source code sample datasets and lecture slides

**Parallel Programming for Modern High Performance Computing Systems** Pawel

Czarnul,2018-03-05 In view of the growing presence and popularity of multicore and manycore processors accelerators and coprocessors as well as clusters using such computing devices the development of efficient parallel applications has become a key challenge to be able to exploit the performance of such systems This book covers the scope of parallel programming for modern high performance computing systems It first discusses selected and popular state of the art computing devices and systems available today These include multicore CPUs manycore co processors such as Intel Xeon Phi accelerators such as GPUs and clusters as well as programming models supported on these platforms It next introduces parallelization through important programming paradigms such as master slave geometric Single Program Multiple Data SPMD and divide and conquer The practical and useful elements of the most popular and important APIs for programming parallel HPC systems are discussed including MPI OpenMP Pthreads CUDA OpenCL and OpenACC It also demonstrates through selected code listings how selected APIs can be used to implement important programming paradigms Furthermore it shows how the codes can be compiled and executed in a Linux environment The book also presents hybrid codes that integrate selected APIs for potentially multi level parallelization and utilization of heterogeneous resources and it shows how to use modern elements of these APIs Selected optimization techniques are also included such as overlapping communication and computations implemented using various APIs Features Discusses the popular and currently available computing devices and cluster systems Includes typical paradigms used in parallel programs Explores popular APIs for programming parallel applications Provides code templates that can be used for implementation of paradigms Provides hybrid code examples allowing multi level parallelization Covers the optimization of parallel programs      Annual Reports in Computational Chemistry Ralph A.

Wheeler,David C. Spellmeyer,2010-09-06 Annual Reports in Computational Chemistry is a new periodical providing timely and critical reviews of important topics in computational chemistry as applied to all chemical disciplines Topics covered include quantum chemistry molecular mechanics force fields chemical education and applications in academic and industrial settings Each volume is organized into thematic sections with contributions written by experts Focusing on the most recent literature and advances in the field each article covers a specific topic of importance to computational chemists Annual Reports in Computational Chemistry is a must for researchers and students wishing to stay up to date on current developments in computational chemistry Broad coverage of computational chemistry and up to date information Topics covered include bioinformatics drug discovery protein NMR simulation methodologies and applications in academic and industrial settings Each chapter reviews the most recent literature on a specific topic of interest to computational chemists
