THE PIONEER OF DISAPPEARING MESSAGES

READING COMPREHENSION

Snapchat, founded in 2011 by Evan Spiegel, is a social media platform known for its disappearing messages. Its primary feature is the ability to send messages that disappear after being viewed, making it a pioneer in the field of ephemeral messaging. To use Snapchat, users can send snaps directly to friends, and recipients can view the content for a few seconds before it disappears. The Snap feature, however, has given users a sense of privacy as Snapchat also introduced the "Discover" section, which allows users to view a variety of content from publishers, influencers, and brands. This feature revolutionized capturing moments in a more interactive and personal communication technology with its innovative filters and lenses. Snapchat's influence goes beyond citizen journalism and documenting breaking news; have provided journalists with a new platform to share their stories. The Stories feature allows users to play with filters and effects that align with Snapchat's branding. While Snapchat has maintained its social media platform, it has also introduced innovative AR effects, Instagram Stories, and more. As users move away from the platform, it has not been without its challenges. It's addictive but achieves comprehension and interaction with some users. Nonetheless, Snapchat's impact on the concept of disappearing messages introduced innovative AR experiences, a platform of the future, catering to a generation that values interactions.
