Why Science Is Wrong:

Why Science Is Wrong...about Almost Everything Alex Tsakiris, 2015-06 A Rollicking Assault on Science's Inability to Answer Life's Most Important Questions Alex Tsakiris has interviewed many bestselling authors and dozens of world class academics on his popular science podcast Skeptiko.com In this book he shares with us what he's learned through his 200 plus interviews with some of the world's leading consciousness researchers and thinkers In doing so he reveals what the best research is saying about big picture science questions and the limits of science in general What's he's learned in short is that science as we know it is an emperor with no clothes on proposition It mesmerizes us with flashy trinkets while failing at its core mission of leading us toward self discovery Science is wrong about almost everything because science depends on our consciousness being an illusion and it's not ALEX TSAKIRIS is a successful entrepreneur turned science podcaster In 2007 he founded Skeptiko.com which has become the 1 podcast covering the science of human consciousness Alex has appeared on syndicated radio talk shows both in the US and the UK He lives in Del Mar California

Everything You Know About Science is Wrong Matt Brown, 2017-02-16 A highly entertaining myth busting read for anyone with even a passing interest in science Hot on the heels of the fascinating compendium Everything You Know About London Is Wrong this next book in the series written by author Matt Brown in his trademark humorous style debunks the scientific myths we all take for granted Does nothing travel faster than the speed of light Well in certain circumstances a winded tortoise can go faster Are there actually seven colours in a rainbow Think again And our author merrily explains why our hair and nails don't keep growing after we die and why chemicals in our diet might not be the toxic threats we are led to believe Covering everything from pseudoscience to phenomena of physics scandals of space and scientific misquotes Everything You Know About Science is Wrong shatters a range of illusions we have accepted unquestioningly since childhood and demystifies this most puzzling of subjects

Getting Science Wrong Paul Dicken, 2018-01-11 When Galileo dropped cannon balls from the top of the Leaning Tower of Pisa he did more than overturn centuries of scientific orthodoxy At a stroke he established a new conception of the scientific method based upon careful experimentation and rigorous observation and also laid the groundwork for an ongoing conflict between the critical open mindedness of science and the recalcitrant dogmatism of religion that would continue to the modern day The problem is that Galileo never performed his most celebrated experiment in Pisa In fact he rarely conducted any experiments at all The Church publicly celebrated his work and Galileo enjoyed patronage from the great and the powerful his ecclesiastical difficulties only began when disgruntled colleagues launched a campaign to discredit their academic rival But what does this tell us about modern science if its own foundation myth turns out to be nothing more than political propaganda Getting Science Wrong discusses some of the most popular misconceptions about science and their continuing role in the public imagination Drawing upon the history and philosophy of science it challenges wide spread assumptions and misunderstandings from creationism and climate change to the use of statistics and

computer modelling The result is an engaging introduction to contentious issues in the philosophy of science and a new way of looking at the role of science in society

The Geek Manifesto: Why Science Matters to Government (mini ebook)
Mark Henderson, 2012-05-04 This mini ebook features a sample chapter from Mark Henderson's brilliant new book THE GEEK MANIFESTO why science matters The geeks are coming And our world needs them We live in a country where A writer can be forced into court for telling the scientific truth The media would rather sell papers by scaremongering about the MMR vaccine or GM crops than reporting the facts A government advisor was sacked for a decision based on science rather than public opinion Only one of our 650 MPs has ever worked as a research scientist It is time to entrench scientific thinking more deeply into politics and society To fight for policy based on evidence The full book is available from 12th May 2012

Why Science Is Sexist Nicola Gaston, 2015-11-09 Science changes the world because the creation of knowledge opens up new pathways for us to explore new ways of doing things and new questions to ask My optimism lies in the fact that I think that the answer to why science is sexist does all of these things In this eye opening BWB Text Nicola Gaston President of the New Zealand Association of Scientists reveals the ways in which the discipline of science is sexist From the under representation of women to the argument that mental capabilities are gendered Gaston demonstrates the extent of our unconscious bias against female scientists and warns of its damaging consequences for science and for society In asking what can be done to combat this bias she calls for us to rethink not just our attitudes towards gender but also towards scientific knowledge and inquiry

Why Science Is Wrong About Life and Evolution Ted Christopher, 2020-12-14 Serious problems have long been apparent for the scientific understanding of life in particular with regards to unusual behaviors The general challenge unfolding for that understanding or vision though is in identifying the DNA basis for much of our inheritance Without such a DNA genetic basis science's vision of life and evolution does not work In parallel with such challenges are concerns about the general fallout from science's mechanistic vision of life That vision herein described as the cornerstone of scientism has become an intellectual juggernaut The latter half of this book takes on that juggernaut via critical examination of some of the works of Steven Pinker and Sam Harris
