**Role of Generative AI in the Communication Classroom** Elmoudden, Sanae,Wrench, Jason S.,2024-02-12 In an era marked by the rapid integration of Artificial Intelligence AI into our lives the discourse surrounding its implications has intensified The Role of Generative AI in the Communication Classroom is a pioneering book that delves into the multifaceted

dimensions of AI specifically focusing on OpenAI's revolutionary Chat Generative Pre Trained Transformer Chat GPT and its profound influence on the landscape of communication education. This book navigates the intersection of technology, education, and ethics, shedding light on the imperative need for a collaborative approach to shape AI's evolution. AI's potential to reshape industries and human roles is undeniable. Rooted in the intricate workings of AI and its hallmark Chat GPT, this book meticulously dissects the dynamic relationship between humans and machines. The discourse extends beyond technology and into the realm of education, asserting that the power to mold AI's trajectory cannot rest solely in the hands of developers. While revealing AI's transformative potential in the communication classroom, the book conscientiously explores ethical concerns and biases, fostering a balanced approach to its integration. This book is instrumental to the ongoing discourse on AI's role in education. The call for ethical considerations, inclusivity, and regulation serves as a guiding compass for educators, students, developers, and policymakers alike. The book ensures a holistic perspective on AI's integration by addressing privacy, citation, voice ownership, and overall digital ethics.

*Meeting SDGs in Smart City Infrastructures* Manas Pradhan, 2025-09-01

*Meeting SDGs in Smart City Infrastructures* Federation Interoperability and Discoverability explains the current state of the art practices in the smart city context for digitization and e-governance processes in accordance with the UN Sustainable Development Goals. It discusses pros and cons of the various data standards and federation measures involved in the digital transformation of cities, considering the end user as well as implementor's viewpoint. It utilizes real-world use cases of cities around the world, highlighting their goals and what measures they have adopted. It provides guidelines for achieving long-term service federation interoperability and discoverability while keeping the UN SDGs in perspective. This book provides the basic insights for technical and strategic viewpoints for data and communication interoperability and federation measures. Later, it provides federated scaling solutions to enable service discovery and features in a cross-sector deployment. These are useful for designing digitization measures by using one or leveraging overlapping features of many introduced solutions. These solutions are provided for specific contexts and use cases, making the understandability of the technical interfaces and their relationship with governance mechanisms easier for a range of audiences working in smart city contexts. This book will help practitioners and researchers in the smart city domain better understand existing and evolving technologies and how to better formulate their processes to provide a sustainable model for urban development. Giving them insight into the feasibility and implications of highly scalable smart city and urban solutions will allow better constructs for urban digital ecosystems, enabling information exchange and interoperability across multiple sectors. It ultimately supports infrastructure goals of ensuring security, privacy, and transparency while enabling future concepts for Artificial Intelligence, Machine Learning, Linked Data, and e-governance. Defines and describes real-world digital transformation needs arising from smart city domain. Analyzes standards, methods, and best practices related to processes in smart city infrastructure builds. Analyzes and makes recommendations related to the technologies, both legacy and upcoming.

their set up functions and the future requirements to meet the SDGs *Contemporary Issues in Early Childhood Education and Care*, 2025-02-05 Contemporary Issues in Early Childhood Education and Care delves into the dynamic landscape of early childhood education and critically addresses the intersection of theory and practice offering a range of theoretical frameworks and practical strategies to support the holistic development of children. It explores a diverse array of topics including integrating artificial intelligence tools in preschool settings, the development of metacognitive skills in young children and the role of participatory practices in fostering democratic engagement. It also examines resilience building through innovative playground designs and the importance of inclusive approaches for refugee and immigrant populations. This book also presents entrepreneurial coaching as a framework for enhancing children's participation, lifelong learning and values driven parenting from a Christian perspective. Additionally the volume highlights the impact of the COVID 19 pandemic on young children's psychological well being emphasizing their heightened awareness and involvement in decision making processes. Inclusive assessment methods supporting shy children in educational settings are explored and the benefits of slow pedagogy versus hurried schooling are examined. Furthermore it investigates the role of statistical analysis in shaping early childhood education policies and practices. This work underscores community support systems can mitigate stress and adversity and strengthen children's capacity to thrive in their communities. At the same time play environments can nurture physiological and psychological resilience. With a strong focus on equity, pedagogical innovation and evidence based approaches this volume is an essential resource for educators, researchers and policymakers to create inclusive, equitable and supportive learning environments that foster lifelong learning trajectories *Proceedings of the ...*

In this workshop although there were still some exotic applications a more practical view of the applications and limitations of current AI technology dominated the participants discussions. With its resultant focus on reliability and safety considerations the workshop posed as many questions as it answered. It provides an excellent mirror of the current state of the art which these proceedings are intended to illustrate

**Artificial Intelligence in Design '91** John S. Gero, 1991 Artificial Intelligence in Design '91 is a collection of 47 papers from the First International Conference on Artificial Intelligence in Design held at Edinburgh in June 1991. The papers in this book are grouped into 13 headings starting with a background of AI design systems and to which extent AI that results from being used as planning tool be applied to quality oriented design processes in architecture. A constraint driven approach to object oriented design is also shown on real world objects. The use of CADSYN in the structural design of buildings is examined along with design dependent knowledge and design independent knowledge. Discussions on empowering designers with integrated design environments are given.

whereby design objects may be retrieved from catalogues without requiring users to form queries Mention is given to automated adjustment of parameter values frequently used in computer routine applications The book also introduces the Computer Aided Design CAD as applied to architecture Design representation using data models non monotonic reasoning in design and the cognitive aspects of design using empirical studies are discussed Topics of the industrial applications of AI in design such as the needed steps to develop a successful AI based tool and a review of the Castlemain Project and telecommunication distribution networks follow This book is suitable for programmers computer science students and architects and engineers who use computers in their line of work
