**Time and Narrative, Volume 3** Paul Ricoeur, 2024-05-31 In the first two volumes of this work Paul Ricoeur examined the relations between time and narrative in historical writing fiction and theories of literature This final volume a comprehensive reexamination and synthesis of the ideas developed in volumes 1 and 2 stands as Ricoeur s most complete and satisfying presentation of his own philosophy Ricoeur s aim here is to explicate as fully as possible the hypothesis that has governed his inquiry namely that the effort of thinking at work in every narrative configuration is completed in a refiguration of temporal experience To this end he sets himself the central task of determining how far a poetics of narrative can be said to resolve the aporias the doubtful or problematic elements of time Chief among these aporias are the conflicts between the phenomenological sense of time that experienced or lived by the individual and the cosmological sense that described by history and physics on the one hand and the oneness or unitary nature of time on the other In conclusion Ricoeur reflects upon the inscrutability of time itself and attempts to discern the limits of his own examination of narrative discourse As in his previous works Ricoeur labors as an incomparable mediator of often estranged philosophical approaches always in a manner that compromises neither rigor nor creativity Mark Kline Taylor Christian Century In the midst of two opposing contemporary options either to flee into ever more precious readings or to retreat into ever more safe readings Ricoeur s work offers an alternative option that is critical wide ranging and conducive to new applications Mary Gerhart Journal of Religion

Hidden in Historicism Harry Jansen, 2020-06-10 Hidden in Historicism considers how the nineteenth century philosophy of historicism depicts three forgotten time regimes a time of rise and fall an ambiguous time of synchronicity of the non synchronous and a time in which decisive moments dominate Before the eighteenth century time was past oriented This inverted in the Enlightenment when the future became dominating Today this time of progress continues to be embraced as a time of the modern Yet inequality increasing violence and climate change lead to doubts over a bright future In this book Harry Jansen moves away from the heritage of Reinhart Koselleck and his single time of the modern towards a historicist threefold temporal approach to history writing In the time regime of the twenty first century past present and future coexist It is a heterogeneous time that takes on the three forms of historicism Jansen's study shows how all three times exist together in current historiography and contribute to a better understanding of the world today Based on the idea that an incarnated time rules everything that happens in reality the book offers a fresh perspective on the ongoing discussion about time and time regimes in contemporary philosophy and theory of history for students and scholars both time specialists and the non specialist
