Have you always wanted to learn EXCEL VBA Programming but are afraid it'll be too difficult for you? What if you had access to an Excel VBA guide who would literally take you step by step through every essential process of learning this application? Excel is one of the most powerful software tools in the world for collecting, analyzing and summarizing data but its incredible power comes at a cost. Excel is a massive program and it can literally take a beginner months or even years to master it. Research shows that many first time Excel users don't take advantage of all the program's functionality. Beginners continue to manually enter data instead of easily using macros that could save them a ton of time and skyrocket their productivity. Over the years I have realized that nearly every operation that you could perform with a mouse, keyboard or a dialog box could also be done by using VBA. Further, if it can be done once with VBA it can easily be done a hundred or a thousand times. As you read this book you will start to realize the incredible power that VBA has in automating repetitive or routine tasks. Whether your goal is to use Excel VBA in your day job to enhance your productivity or you would like to use your VBA Programming skills in another profession I can tell you this: This book is for you.
