

Typical Components of a Verbal Reasoning Test

Check how many questions you need to answer

Keep an eye on the time limit

Understand the question

The most common format for verbal tests is you have to determine if, based on the passage, a statement is either true, false, or impossible to say without further information.

The screenshot shows a test interface with a yellow header bar. On the left, a large yellow number '4' is next to the text 'Assessment Day' and 'Practice Test Figures'. Below this, it says 'Question 2 of 30' and 'Time remaining for test: 24:01'. The main area contains a passage about China's one-child policy. Below the passage are three multiple-choice options: 'A. True', 'B. False', and 'C. Cannot say'. At the bottom, there are two green buttons labeled 'Back' and 'Next'. Red arrows point from external text boxes to various parts of the interface: from 'Check how many questions you need to answer' to the question number; from 'Keep an eye on the time limit' to the time remaining; from 'Understand the question' to the question text; from 'Important: make sure you base your answers only on the information in the passage.' to the passage box; from 'The passage can be about anything and you don't have to know anything about the subject. Verbal tests assess your reasoning logic, not your learned knowledge.' to the passage box; and from 'Some tests allow you to go back and forward through questions.' to the 'Back' and 'Next' buttons.

Assessment Day
Practice Test Figures

Question 2 of 30
Time remaining for test: 24:01

The passage suggests that two-child families will dramatically increase, as child-free adults reach child-bearing age.

A. True
B. False
C. Cannot say

Instituted in 1979 as a temporary measure to limit population growth, China's one-child policy remains in force today and is likely to continue for another decade. China's population control policy has attracted criticism because of the manner in which it is enforced, and also because of its social repercussions. Supporters of the Chinese government's policy consider it a necessary measure to curb extreme overpopulation, which has resulted in a reduction of an estimated 300 million people in its first twenty years. Not only is a reduced population environmentally beneficial, it also increases China's per capita gross domestic product. The one-child policy has led to a disparate ratio of males to females - with abortion, abandonment and infanticide of female infants resulting from a cultural preference for sons. Furthermore, draconian measures such as forced sterilisation are strongly advocated couples without siblings to have two children - a provision which applies to millions of child-free adults now of child-bearing age.

Back Next

Important: make sure you base your answers only on the information in the passage.

The passage can be about anything and you don't have to know anything about the subject. Verbal tests assess your reasoning logic, not your learned knowledge.

Some tests allow you to go back and forward through questions.
