The Future of Luxury Brands Annamma Joy, 2022-02-07 The concepts of artification and sustainability are now both at the heart of luxury brand marketing strategies. Artification as an ongoing process of transformation in the world of art and sustainability as an indispensable response to the issues of our times. *The Future of Luxury Brands* examines three interrelated luxury marketing segments: the art world, fashion and fine wines, including hospitality services through the dual lenses of sustainability and artification. From safeguarding human and natural resources to upholding labor rights and protecting the environment, sustainability has taken center stage in consumer consciousness, embodying both moral authority and sound business practices. At the same time, artification, the process by which non-art is reconceived as art, applies the cachet of art to business, affording commercial products the sacred status accorded to works of art. When commercial products enter the realm of aesthetic creation, artification and consumer engagement inevitably increases. This pioneering book examining artification and sustainability as strategic pillars of marketing strategies in the luxury industry will be essential reading for practitioners working in luxury product companies as also students of luxury brand marketing.

The Routledge Handbook of Place Tim Edensor, Ares Kalandides, Uma Kothari, 2020-05-26 The handbook presents a compendium of the diverse and growing approaches to place from leading authors as well as less widely known scholars, providing a comprehensive yet cutting edge overview of theories, concepts and creative engagements with place that resonate with contemporary concerns and debates. The volume moves away from purely western based conceptions and discussions about place to include perspectives from across the world. It includes an introductory chapter which outlines key definitions, draws out influential historical and contemporary approaches to the theorisation of place and sketches out the structure of the book, explaining the logic of the seven clearly themed sections. Each section begins with a short introductory essay that provides identifying key ideas and contextualises the essays that follow. The original and distinctive contributions from both new and leading authorities from across the discipline provide a wide, rich and comprehensive collection that chimes with current critical thinking in geography. The book captures the dynamism and multiplicity of current geographical thinking about place by including both state of the art in-depth critical overviews of theoretical approaches to place and new explorations and cases that chart a framework for future research. It charts the multiple ways in which place might be conceived, situated and practised. This unique, comprehensive and rich collection will be an essential resource for undergraduate and graduate teaching for experienced academics across a wide range of disciplines and for policymakers and place marketers. It will provide an invaluable and up to date guide to current thinking across the range of disciplines such as Geography, Sociology,
