Resource Tool For Teachers Lina Kashyap, Prachee Joeg, Gamifying Learning Experiences for Students is a book written for all school teachers in India as they are the foundation of our nation's education system and at the heart of the learning process. In line with the NEP 2020 as teachers navigate their evolving role in a student-centered classroom, we aim to equip them with a vital teaching tool: interactive group games that can be used effectively in every classroom in India. This book is a resource manual for school teachers of children aged 6-16 years. It offers a handy tool to teach, revise subjects and enhance the social, emotional, and cognitive development of children. School teachers will find games outlined for various developmental needs of the child, including games to channel the child's energy, challenge them cognitively, aid in revising subjects, and enhance their soft skills. The book presents games in a reader-friendly way, clearly formatted for any teacher to use. The games are outlined step by step with a detailed understanding of why and how they are to be played. Targeted debriefs after each game detailing several reflective questions for teachers to discuss with their students further aid the learning process. Teachers can also use these games to enable students to learn and fine-tune their logical thinking, reasoning, and problem-solving skills, as well as their socialization, communication, leadership, and teamwork skills. Additionally, these games help students develop their emotional quotient, as the world of work today requires both a high IQ and EQ. Some of the traditional Indian games described in this book may already be known to teachers and students. However, we have provided variations and adaptations that can be easily used by subject and class teachers for teaching or revising topics and for developing critical thinking, social, and emotional learning in students. Being traditional games, readers will understand them well, yet the adaptations suggested for the educational setting serve a different purpose.
