Knowledge, Space, Economy John Bryson,Peter Daniels,Nick Henry,Jane Pollard,2002-01-04 We are now living through a period of knowledge capitalism in which as Castells put it the action of knowledge upon knowledge is the main source of productivity In the face of such transformation the economic social and institutional contours of contemporary capitalism are being reshaped At the heart of this world are an emergent set of economies regions institutions and peoples central of the flows and translations of knowledge This book provides an interdisciplinary review of the triad of knowledge space economy on entering the twenty first century Drawing on a variety of disciplinary backgrounds the first part of the book comprises a set of statements by leading authors on the role of knowledge in capitalism Thereafter the remaining two parts of the book explore the landscape of knowledge capitalism through a series of analyses of knowledge in action within a range of economic political and cultural contexts Bringing together a set of authors from across the social sciences this book provides both a major theoretical statement on understanding the economic world and an empirical exemplification of the power of knowledge in shaping the spaces and places of today s society

Sreekanth,Sisir Roy,2019-12-06 This book examines issues related to the concepts of space time and causality in the context of modern physics and ancient Indian traditions It looks at the similarity and convergence of these concepts of modern physics with those discussed in ancient Indian wisdom The volume brings the methodologies of empiricism and introspection together to highlight the synergy between these two strands It discusses wide ranging themes including the quantum vacuum as ultimate

reality quantum entanglement and metaphysics of relations identity and individuality and dark energy and anti matter as discussed in physics and in Indian philosophical schools like Vedanta Yoga Buddhist Kashmiri Shaivism and Jaina Philosophy First of its kind this book will be an essential read for scholars and researches of philosophy Indian philosophy philosophy of science theoretical physics and social science *Space, Time, and Stuff* Frank Arntzenius,Cian Seán Dorr,2012-01-19 Frank Arntzenius presents a series of radical ideas about the structure of space and time and establishes a new metaphysical position which holds that the fundamental structure of the physical world is purely geometrical structure He argues that we should broaden our conceptual horizons and accept that spaces other than spacetime may exist **Quantum Space-Time Dynamics** Hontas Farmer,2009-01-01 General Relativity and Quantum Field Theory The glaring theoretical problem for 21st century physics is how to unite the two great theories of 20th century physics I have done just this by considering the problem from a fresh new perspective The result is a theory that is mathematically simple and elegant Based on one postulate I am able to derive a very simple mathematical formulation Using this formulation I find results for the Schwarzschild radius of a black hole the bounce of a neutron in Earth's gravity and the entropy of a black hole I also have discovered that space time is in fact a conserved quantity *The Ways of Knowing* William Pepperell Montague,1925
