**Time Series Analysis** James D. Hamilton, 2020-09-01 An authoritative self-contained overview of time series analysis for students and researchers. The past decade has brought dramatic changes in the way that researchers analyze economic and financial time series. This textbook synthesizes these advances and makes them accessible to first year graduate students. James Hamilton provides comprehensive treatments of important innovations such as vector autoregressions, generalized method of moments, the economic and statistical consequences of unit roots, time varying variances, and nonlinear time series models. In addition he presents basic tools for analyzing dynamic systems including linear representations, autocovariance generating functions, spectral analysis and the Kalman filter in a way that integrates economic theory with the practical difficulties of analyzing and interpreting real world data. Time Series Analysis fills an important need for a textbook that integrates economic theory, econometrics and new results. This invaluable book starts from first principles and should be readily accessible to any beginning graduate student while it is also intended to serve as a reference book for researchers.

**Theory and Applications of Time Series Analysis and Forecasting** Olga Valenzuela, Fernando Rojas, Luis Javier Herrera, Héctor Pomares, Ignacio Rojas, 2023-04-04 This book presents a selection of peer reviewed contributions on the latest developments in time series analysis and forecasting presented at the 7th International Conference on Time Series and Forecasting ITISE 2021 held in Gran Canaria Spain July 19-21 2021. It is divided into four parts. The first part addresses general modern methods and theoretical aspects of time series analysis and forecasting while the remaining three parts focus on forecasting methods in econometrics, time series forecasting and prediction and numerous other real world applications. Covering a broad range of topics the book will give readers a modern perspective on the subject. The ITISE conference series provides a forum for scientists, engineers, educators and students to discuss the latest advances and implementations in the foundations, theory, models and applications of time series analysis and forecasting. It focuses on interdisciplinary research encompassing computer science, mathematics, statistics and econometrics.
