Algorithms and

Architectures for Real-Time Control 2000 V. Hernandez,G.W. Irwin,2000-12-04 The 6th IFAC Workshop on Algorithms and Architectures for Real Time Control AARTC 2000 was held at Palma de Mallorca Spain The objective as in previous editions was to show the state of the art and to present new developments and research results in software and hardware for real time control as well as to bring together researchers developers and practitioners both from the academic and the industrial world The AARTC 2000 Technical Program consisted of 11 presented sessions covering the major areas of software hardware and applications for real time control In particular sessions addressed robotics embedded systems modeling and control fuzzy logic methods industrial process control and manufacturing systems neural networks parallel and distributed processing processor architectures for control software design tools and methodologies and SCADA and multi layer control A total of 38

papers were selected from high quality full draft papers and late breaking paper contributions consisting of extended abstracts. Participants from 15 countries attended the AARTC 2000 workshop. The technical program also included two plenary talks given by leading experts in the field. Roger Goodall, Department of Electronic and Electrical Engineering, Loughborough University, UK presented 'Perspectives on processing for real time control' and Ricardo Sanz, Universidad Politécnica de Madrid, Spain focused on 'CORBA for Control Systems'. Another highlight in the program was the final session on industrial presentations which was held in common with the Workshop on Real Time Programming (WRTP 2000). In this session Abel Jiménez, Industria de Turbo Propulsores S.A., Spain presented the 'Thrust Vectoring System Control Concept' and Ulrich Schmid, Technische Universität Wien, Austria made a presentation with the title 'Applied Research A Scientist's Perspective' and Harold W. Lawson, Lawson Konsult AB, Sweden addressed 'Systems Engineering of a Successful Train Control System'. [Introduction to Parallel Computing](#) Ananth Grama, 2003. A complete source of information on almost all aspects of parallel computing, from introduction to architectures to programming paradigms to algorithms to programming standards. It covers traditional Computer Science algorithms, scientific computing algorithms and data intensive algorithms.

Computer-Aided Design of Analog Integrated Circuits and Systems Rob A. Rutenbar, Georges G. E. Gielen, 2002-05-06. The tools and techniques you need to break the analog design bottleneck. Ten years ago analog seemed to be a dead end technology. Today System on Chip (SoC) designs are increasingly mixed signal designs. With the advent of application specific integrated circuits (ASIC) technologies that can integrate both analog and digital functions on a single chip, analog has become more crucial than ever to the design process. Today designers are moving beyond hand-crafted one-transistor-at-a-time methods. They are using new circuit and physical synthesis tools to design practical analog circuits, new modeling and analysis tools to allow rapid exploration of system-level alternatives, and new simulation tools to provide accurate answers for analog circuit behaviors and interactions that were considered impossible to handle only a few years ago. To give circuit designers and CAD professionals a better understanding of the history and the current state of the art in the field, this volume collects in one place the essential set of analog CAD papers that form the foundation of today's new analog design automation tools. Areas covered are Analog synthesis, Symbolic analysis, Analog layout, Analog modeling and analysis, Specialized analog simulation, Circuit centering and yield optimization, Circuit testing, Computer Aided Design of Analog Integrated Circuits and Systems. This is the cutting-edge reference that will be an invaluable resource for every semiconductor circuit designer and CAD professional who hopes to break the analog design bottleneck.
