TPV & TPVF

Series Valves

DBS Technology™ (Debris Bypass System)

DBS Technology™ is a patented metering pin and diaphragm assembly that allows for small

particles to pass through the valve without clogging. This self-flushing valve requires no filters, yet is ideal for systems with dirty water or water with debris, silt or sand.

Glue Stop™

TPV Slip-by-Slip models include a patent pending feature which protects the downstream "bleed" port of the valve during installation. The Glue Stop™ feature effectively blocks unwanted glue migration that could lead to valve failure. It's a safety-system built to handle what a valve installation can dish out.

Robust Diaphragm

The thick double-beaded diaphragm ensures a smooth and positive sealing. Being

ozone-resistant means the durability of the diaphragm is not compromised should the water be ozone treated. And for systems with heavy salt content, it's also chloramine-resistant. The diaphragm fits into the valve in any axial position allowing for simple servicing should the need ever arise.

Features & Benefits

The search for a full-featured, competitively priced residential and commercial valve is over thanks to Toro's newest 1" valve offering—the TPV Series. These full-featured, rugged, debris-resistant valves feature flow ranges from 0.1 to 40 GPM, making them ideal for everything from drip to high-flow residential and commercial applications. Choose from a variety of inlet and outlet selections to ensure that all site specific requirements are met. The patented DBS Technology™ (Debris Bypass System) ensures valve functionality in nearly all dirty water applications without the use of filters. Add a 5-year warranty and rest assured that the TPV Series will become your workhorse valve for all professional installations.
