TIME For Kids Nonfiction Readers: Advanced Plus Teacher's Guide Chandra Proudh, 2012-09-01
Teaching Life Skills to Children and Teens With ADHD Vincent J. Monastra, 2015-11-16
Teaching Life Skills to Children and Teens with ADHD describes the Life Skills Program created by author Vincent J. Monastra at his ADHD clinic. When children have attention deficit hyperactivity disorder (ADHD) even if their medication smooths out the worst of the bumps they still may have a lot of trouble in social situations like school. Teaching Life Skills to Children and Teens with ADHD features practical strategies for helping children and teens develop essential life skills at home, school or in a support group setting. Some of these skills include: Engaging others in conversations, Seeking out confidence building experiences, Responding appropriately to teasing, Establishing friendships and social networks, Trying group activities to avoid isolation, Developing healthy eating, sleeping and exercise habits, Solving problems and getting organized, Showing sensitivity to others' emotions. Each chapter includes exercises to help you teach, model and guide your child in trying out these skills. Interactive checklists, quizzes and guided journal entries are provided as tools for reflection and for engaging children and teens in ways that are interesting and fun.

Evidence-Based Practice in School Mental Health James C. Raines, 2019-03-19
Though schools have become the default mental health providers for children and adolescents, they are poorly equipped to meet the mental health needs of their students. Evidence-Based Practice in School Mental Health differs from other books that address child and adolescent psychopathology by focusing on how to help students with mental disorders in pre-K through 12th grade schools. Chapters address the prevalence of a disorder in school age

populations appropriate diagnostic criteria differential diagnosis comorbid disorders available rapid assessment instruments school based interventions using multi tiered systems of support and easy to follow suggestions for progress monitoring Additionally the text shares detailed suggestions for how school based clinicians can collaborate with teachers parents and community providers to address the needs of youth with mental health problems Each chapter finishes with extensive web resources and real life case examples drawn from the author s clinical practice This book serves as a helpful resource for school based mental health providers e g school social workers school psychologists and school counselors communities in schools coordinators and MSW students focusing on child and adolescent mental health

Practicing College Learning Strategies Carolyn H. Hopper,2006-05-30 Practicing College Learning Strategiespresents practical applications of study skills in a clear and concise workbook style format The text is known for providing ample exercises throughout each chapter reflecting the author s belief that students can be taught how to learn more effectively through hands on reinforcement Now produced in 2 color the Fourth Edition has a sleek design and is organized around a new learning strategies framework This framework includes chapter opening objectives that preview the materials students

are about to learn. The author presents the latest research on the brain helping students to understand how they learn how to capitalize on their strengths and how to adjust for their weaknesses. Structured activities and exercises guide students in the reflection process to make the information personal and useful and to provide practice opportunities. The straightforward explanations and structured activities that model the learning process make this text especially useful for first time college students or returning adults. Survival Kit in the first pages of the text provides a quick overview of the most basic skills that students need to be productive from day one. New to the Fourth Edition is a Checklist for Evaluating your Classroom Savvy. Two new critical thinking features, Making it Concrete and Making Connections, help students analyze and synthesize what they've learned and apply new concepts or skills to other courses or situations. Measurable Learning Outcomes have been added to the opening of each chapter and can act as the basis for selecting content, classroom activities and assessments such as chapter or unit tests and final projects or exams. Case Study: What's Your Advice asks students to synthesize and evaluate what they learn in the form of advice to others. Virtual Field Trips are integrated technology boxes that point to online assignments that explore college social skills such as managing finances, campus safety and health and well-being issues. Brain Bytes show students how memory strategies work and provide tools to maximize retention for improved performance, school achievement and personal success.
