Across the Aisle Jason Gabriel Kondrath,2025-12-12 Jason Gabriel Kondrath writes romance the way storms roll in slow at first then all at once Born in Michigan and shaped by the grit of small towns and long winters he builds love stories that burn hot break hard and haunt long after the last page His characters fight for connection the way some people fight for survival fiercely imperfectly and with their whole hearts on the line Whether he s charting the rise of a troubled frontman in Rock God or capturing the fragile fire between two people who never expected to collide Kondrath specializes in relationships that feel lived in raw and dangerously real His worlds blend passion with pressure intimacy with consequence and desire with the kind of emotional gravity that pulls readers in and refuses to let go When he isn t writing he s studying human behavior chasing the perfect emotional beat and exploring the places where love becomes transformation messy beautiful and undeniable **MotorBoating** ,1969-12 Construction Equipment and Materials ,1961 **User-centered design of**

wearable computers with construction kits for children Laura Grönewald,2022-01-18 Seminar paper from the year 2021 in the subject Engineering Computer Engineering grade 1 0 University of Siegen language English abstract Addressing children s needs and interests is crucial when designing and developing computational devices for this user group Different approaches to include children in the design process such as Participatory Design have been investigated and applied in past research A way to engage children as active design partners is to let them build and reconfigure their own devices Construction kits as they have been developed by researchers in the past enable children to do so Several application scenarios for why children would build their own handhelds and wearable computers with different construction kits have been identified in past research The hardware and software components that were included in developed kits as well as the way they were used and evaluated varied widely This paper outlines the evolution of the investigation and application of construction kits in the research field of wearable computers for children By referring to approaches and findings presented in related work this paper aims to highlight the potential of using these insights as a basis for future investigations and user centered design processes Despite the technological advances it is argued that design and development processes for wearable computers for children can benefit from past research *Communicating Science to the Public* Leo Tan Wee Hin,R.
