**Beginning Google Maps Applications with Rails and Ajax** Andre Lewis, Cameron Turner, Jeffrey Sambells, Michael Purvis, 2007-05-02 The Google Maps API remains one of the showcase examples of the Web 2.0 development paradigm. **Beginning Google Maps Applications with Rails and Ajax: From Novice to Professional** is the first book to comprehensively introduce the service from a developer perspective showing you how you can integrate mapping features into your Rails driven web applications. Proceeding far beyond simplistic map display, you'll learn how to draw from a variety of data sources such as the U.S. Census Bureau's TIGER Line data and Google's own geocoding feature to build comprehensive geocoding services for mapping many locations around the world. The book also steers you through various examples that show how to encourage user interaction such as through pinpointing map locations, adding comments, and building community driven maps. You'll want to pick up a copy of this book because this is the first book to comprehensively introduce the Google Maps application development using the Rails development framework. You'll be introduced to the very latest changes to the Google Maps API embodied in the version 2 release. It is written by four developers actively involved in the creation of location based mapping services. For additional info, please visit the author's reference site for this book: [24-Hour Cities](#) Hugh F. Kelly, 2016-07-15 Winner of the Gold Award in the Tenth Annual Robert Bruss Real Estate Book Competition. **24 Hour Cities** is the very first full length book about America's cities that never sleep. Over the last fifty years, the nation's top live/work/play cities have proven themselves more than just vibrant urban environments for the elite. They are attracting a cross section of the population from across the U.S. and are preferred destinations for immigrants of all income strata. This is creating a virtuous circle wherein economic growth enhances property values, stronger real estate markets sustain more reliable tax bases, and solid municipal revenues pay for better services that further attract businesses and talented individuals. Yet just a generation ago, cities like New York, Boston, Washington, San Francisco, and Miami were broke financially and physically scarred by violence and prime examples of urban dysfunction. How did the turnaround happen? And why are other cities still stuck with the hollow downtowns and sprawling suburbs that make for a 9 to 5 urban configuration? Hugh Kelly's cross disciplinary research identifies the ingredients of success and the recipe that puts them together. **Don't Travel without iPhone** Jimmy Chang, [The New Advertising](#) Valerie K. Jones, Ruth E. Brown Ph.D., Ming Wang, 2016-09-19 The era of big data has revolutionized many industries including advertising. Unlike most other books that focus on one niche topic, this two volume set investigates the overall discipline of advertising in the modern context. the backdrop of digital data collection and use The key topics of branding content interaction engagement big data and measurement are addressed from multiple perspectives With contributions from experts in academia as well as the advertising and marketing industries this unique set is an indispensable resource that is focused specifically on new approaches to and forms of advertising Readers will gain an understanding of the distinct shifts that have taken place in advertising They will be able to build their knowledge on frameworks for navigating and capitalizing on today s fragmented consumer focused digital media landscape and they will be prepared for what the future of advertising will likely bring
