Mathematics Teaching Today Terese Herrera, 2007 Mathematics Teaching Today Improving Practice Improving Student Learning Second Edition updates the NCTM groundbreaking publication Professional Standards for Teaching Mathematics first published in 1991 Like the original this updated volume articulates a vision for effective mathematics teaching and describes the support systems that are required to achieve that vision This book delineates Standards for various aspects of the teaching profession including teachers practise professional supervision collegial interaction and career long professional growth However more than curriculum standards documents are needed to improve student learning and achievement Teaching matters Therefore exploring what goes on in mathematics classrooms is essential to identifying issues and looking for opportunities for improvement Principles and Standards for School Mathematics provides a framework for professional

practise that supports the NCTM's vision of more and better mathematics for all children. This book expounds on that framework explicating the roles of teachers, supervisors, teacher educators, mathematicians, professional developers, parents, politicians, community members, and others in improving the teaching and learning of mathematics. The Standards offer a vision for high quality mathematics teaching and support structures for teachers. What matters in the long run however is how classrooms across North America are transformed and how teaching practises evolve to address the mathematical learning needs of children.

The Unstuck Brain ABHIJEET SARKAR, 2025-06-25

The Unstuck Brain: How to Advocate for Your Child with Autism, ADHD, or a Learning Disability at School by Abhijeet Sarkar CEO Founder Synaptic AI Lab

Is your brilliant creative child struggling with focus meltdowns or daily routines? Do you feel lost and overwhelmed trying to navigate the school system? You are not alone. For parents of children with Autism, ADHD, or learning disabilities, the daily battle can be exhausting. You know your child is capable of amazing things, but you watch them get stuck, paralyzed by homework, overwhelmed by transitions, or frustrated by a world that doesn't understand their magnificent, differently wired brain.

The Unstuck Brain is the compassionate practical roadmap you've been searching for. Written by Abhijeet Sarkar, CEO Founder of Synaptic AI Lab, this book bridges a deep understanding of brain science with the real-world actionable strategies you need to transform your home life and become your child's most effective advocate. This isn't just another parenting book. It's a dual toolkit designed for immediate impact:

- Part 1: The Toolkit for a More Peaceful Home** - Finally understand the 'why' behind the struggles. This book demystifies Executive Function, the brain's Air Traffic Controller, and shows you why your child isn't being defiant; they're just overwhelmed. You'll unlock 101 visual strategies, checklists, and games to make abstract concepts like time and planning concrete. Proven techniques to end homework battles, reduce meltdowns, and build your child's emotional regulation. Fun, simple ways to strengthen focus, memory, and flexible thinking, fostering true independence without the constant nagging.
- Part 2: The Playbook for School Success** - Stop feeling intimidated by the school system. Walk into any meeting with confidence and a clear plan. This guide will teach you how to Demystify the IEP, 504 process, and understand your child's legal rights in simple, clear language. Translate what works at home into compelling data the school can't ignore. Master meetings with proven scripts and collaborative negotiation tactics to get the accommodations your child needs to thrive.

The Unstuck Brain rejects the idea of fixing your child and instead shows you how to provide the tools to get them unstuck. It's a guide to turning chaos into calm, confusion into clarity, and conflict into connection.
