Lakhmir Singh's Science for Class 6 Lakhmir Singh & Manjit Kaur, Lakhmir Singh's Science is a series of books which conforms to the NCERT syllabus. The main aim of writing this series is to help students understand difficult scientific concepts in a simple manner in easy language. The ebook version does not contain CD. **Comet for Data Science** Angelica Lo Duca, Gideon Mendels, 2022-08-26. Gain the key knowledge and skills required to manage data science projects using Comet. Key Features: Discover techniques to build, monitor, and optimize your data science projects. Move from prototyping to production using Comet and DevOps tools. Get to grips with the Comet experimentation platform. Book Description: This book provides concepts and practical use cases which can be used to quickly build, monitor, and optimize data science projects. Using Comet, you will learn how to manage almost every step of the data science process from data collection through to creating, deploying, and monitoring a machine learning model. The book starts by explaining the features of Comet along with exploratory data analysis and model evaluation in Comet. You'll see how Comet gives you the freedom to choose from a selection of programming languages depending on which is best suited to your needs. Next, you will focus on workspaces, projects, experiments, and models. You will also learn how to build a narrative from your data using the features provided by Comet. Later, you will review the basic concepts behind DevOps and how to extend the GitLab DevOps platform with Comet, further enhancing your ability to deploy your data science projects. Finally, you will cover various use cases of Comet in machine learning, NLP, deep learning, and time series analysis, gaining hands-on experience with some of the most interesting and valuable data science techniques available. By the end of this book, you will be able to confidently build data science pipelines according to bespoke specifications and manage them through Comet. What you will learn: Prepare for your project with the right data. Understand the purposes of different machine learning algorithms. Get up and running with Comet to manage and monitor your pipelines. Understand how Comet works and how to get the most out of it. See how you can use Comet for machine learning. Discover how to integrate Comet with GitLab. Work with Comet for NLP, deep learning, and time series analysis. Who this book is for: This book is for anyone who has programming experience and wants to learn how to manage and optimize a complete data science lifecycle using Comet and other DevOps platforms. Although an understanding of basic data science concepts and programming concepts is needed, no prior knowledge of Comet and DevOps is required.

Science Bulletin South Africa. Department of Agriculture, 1922. *Deploying Secure Data Science Applications in the Cloud* Lucas H. Benevides e Braga, 2025-10-21. This step-by-step guide is for Data Scientists, ML engineers, and DevOps practitioners who need to turn prototypes into secure, scalable production services on AWS and Google Cloud. With step-by-step instructions and practical examples, this book bridges the gap between building Data Science applications and Machine Learning models and deploying them effectively in real-world scenarios. The book begins with an introduction to essential cloud concepts, providing detailed guidance on setting up a virtual machine (VM) on AWS and later on Google Cloud to serve

applications This includes configuring security groups and establishing secure SSH Secure Shell connections using VSCode Visual Studio Code You will learn how to deploy a dummy HTTP Streamlit application as a foundational exercise before advancing to more complex setups Subsequent chapters dive deeper into key deployment practices such as configuring load balancers setting up domain and subdomain names and securing applications with SSL Secure Sockets Layer certificates The book introduces more advanced deployment strategies using Docker containers and Nginx as a reverse proxy as well as secure serverless deployments of Jenkins Flask and Streamlit You ll also learn how to train machine learning models and use Flask to build APIs that serve those models in production In addition the book offers hands on demonstrations for using Jenkins as an ETL platform Streamlit as a dashboard service and Flask for API development For those interested in serverless architectures it provides detailed guidance on using AWS ECS Elastic Container Service Fargate and Google Cloud Run to build scalable and cost effective solutions By the end of this book you will possess the skills to deploy and manage data science applications on the cloud with confidence Whether you are scaling a personal project or deploying enterprise level solutions this book is your go to resource for secure and seamless cloud deployments What You Will Learn Deploy end to end data science applications with a strong foundation in cloud infrastructure setup including VM provisioning SSH access security groups SSL configuration load balancers and domain management for secure real world deployments Use industry known tools such as Docker Nginx Flask Streamlit and Jenkins to build secure scalable services Understand how to structure and expose machine learning models via APIs for production use Explore modern serverless architectures with AWS Fargate and Google Cloud Run to scale efficiently with minimal overhead Develop a cloud deployment mindset grounded in doing things from scratch before adopting abstracted solutions Who This Book Is For Beginning to intermediate professionals with a basic understanding of Python including Data Scientists ML Engineers Data Engineers and Data Analysts who aim to securely deploy their projects in production environments and individuals working on both personal projects and enterprise level solutions leveraging AWS and Google Cloud setups
