The Human-Centered Classroom KHRITISH SWARGIARY,2025-11-14 Education is standing at the edge of the greatest transformation in human history For centuries schools were designed like factories students entered as raw material were processed through standardized curricula and were expected to emerge as identical products ready for the workforce That model once served a world driven by industrial labor limited information and predictable career paths But today we live in an age of artificial intelligence global connectivity cultural diversity emotional crises and unprecedented technological acceleration The old system is no longer just outdated it is dangerously inadequate This book was born from a simple but urgent question What should education look like in a world where machines can think information is infinite and human beings are searching for meaning As an educator researcher and lifelong learner I have spent years working at the intersection of inclusive education educational technology and policy driven reform Through my engagement with students teachers parents researchers and institutions one reality has become painfully clear while technology is advancing rapidly our education systems are failing to keep pace with the human needs of learners Children are more connected than ever before yet emotionally more isolated Knowledge is everywhere yet understanding is rare Tools are powerful yet compassion and creativity are often neglected This book does not argue that technology is the problem On the contrary it recognizes artificial intelligence digital learning platforms and data driven education as some of the most powerful allies humanity has ever created What we must question however is how these tools are used and whether they are designed to serve human growth or simply economic efficiency When technology is introduced without empathy it deepens inequality When used without ethics it weakens trust But when aligned with human values it becomes a force for extraordinary transformation At the heart of this book lies a conviction The future of education must be human centered emotionally intelligent and radically inclusive Every child whether gifted or struggling disabled or neurodivergent wealthy or underprivileged deserves an education that recognizes their dignity potential and individuality For far too long education systems across the world have defined success by narrow standards of academic performance while ignoring emotional wellbeing creativity adaptability and purpose The result is a generation of students who may be skilled yet uncertain knowledgeable yet disconnected from themselves and the world This book calls for a new educational philosophy one that integrates artificial intelligence with emotional intelligence digital tools with ethical responsibility and innovation with inclusion It presents a vision of classrooms where technology does not replace teachers but empowers them where data supports learning but does not erase human judgment and where every learner regardless of ability or background is seen heard and supported I have written this book not merely as an academic contribution but as a deeply personal and professional commitment to the future of education It is meant for teachers seeking meaning beyond exams policymakers looking for sustainable reform researchers pursuing impact

and students who deserve a learning experience that prepares them not only for jobs but for life The world our children will inherit will be complex uncertain and technologically advanced But it must also be compassionate fair and deeply human Education is the bridge between those two realities If we build that bridge wisely we can ensure that artificial intelligence enhances human potential rather than diminishing it and that progress never comes at the cost of dignity This book invites you to imagine design and lead that future Khritish Swargiary Author AKA KS Luminar **Market Grooming** Sumesh Dadwal,Hamid Jahankhani,Kenneth Revett,2024-11-11 Establishing a paradigm shift in the field of marketing this thought provoking scholarly work examines how customers markets and communities are groomed socially conditioned subliminally marketed to and influenced by the use of AI technologies [eBook: Business Research Methods 5e](#) Boris Blumberg,Claire MacRae,2024-06-13 This book is a one stop guide to all your research methods needs It is tailored specifically towards business and management courses and central to this edition is the balanced coverage of qualitative and quantitative methods to clearly and concisely lead students through the research process whatever their project may be Now in its much anticipated fifth edition Business Research Methods has been revised and updated to reflect all the latest trends in research methodology The integration of statistical issues as well as coverage of web based surveys qualitative interviews big data and content analysis of social media aims to support the current student experience A Running Case Study charts the progression of two student research projects one qualitative and one quantitative and shows how the content of each chapter can be used to develop their projects Thought provoking questions are included to help students consider the issues and decisions involved and how these might be applied to their own project Deeper Insight into Research Methods boxes delve further into particular research issues offering a detailed description to increase understanding of these areas whilst Real Life examples put research methods into context by showing how they have been applied in real world situations New pedagogy features include Research in Practice boxes provide an insight into situations and research decisions that students may encounter in real life projects They contain hints tips and sometimes questions to help think through a project Theory Explained highlights key theories and demonstrates how these can be applied in practical research examples Statistics in Action provides practical alternatives to qualitative research methods and gives examples of how statistical data can be presented analyzed and interpreted to improve students data insights skills The Online Learning Centre contains a vast amount of extra resources to support lecturers and student including power points instructor manuals and a question bank New to this edition are short case studies with teaching notes covering current topics and key theories and worked examples and videos with associated questions for further practical exercises and real world examples Boris F Blumberg is Senior Lecturer and Executive Director of UMIO the postgraduate unit at the Maastricht University School of Business and Economics the Netherlands Boris has supervised hundreds of dissertations and teaches courses in strategic management entrepreneurship and innovation His research focuses mainly on entrepreneurship networks and methodology Claire MacRae is Senior Lecturer in Public Policy at
