Responsible Artificial Intelligence: Re-engineering the Global Public Health Ecosystem Dominique J. Monlezun, 2024-06-07 Artificial intelligence Re-engineering the Global Public Health Ecosystem: A Humanity Worth Saving provides a unifying strategic vision and principles and examples operationalizing it for the AI-accelerated, effective, efficient, and equitable global public health of the future. Readers will find an ecosystem-based approach to understanding how AI is transforming and globalizing public health and thus our underlying political economics contextualized in our diverse cultures. The book integrates data architecture, digital health ecosystem algorithms including machine and deep learning and artificial general intelligence, quantum computing, global disease surveillance, adaptive value supply chains, demographic shifts, integral development, network science, health financing, healthcare system design and multicultural global ethics underlying diverse political economic systems in a clear and concrete way forward together within a divided but digitized and globalized world. Written by the world's first triple doctorate-trained physician, data scientist, and AI ethicist, this book is a compelling and coherent guide to help empower and equip AI developers, students, practitioners, policymakers, researchers, and leaders in digital technology, public health, healthcare, health policy, public policy, political science, economics, and ethics to generate the healthcare solutions that will define humanity's next era. Details the first comprehensive ecosystem analysis of global public health revolutionized by AI. Uses concrete examples to explain the dominant players and trends determining health's future, including through data architecture, financing, political economics, demographics, security, and multicultural ethics. Provides a successful full-spectrum formula for governments, institutions, companies, and communities to scale equitable health globally while respecting local identities and values.
