Mononuclear Phagocytes R. van Furth, 2012-12-06 Sixteen years have passed since the first Leiden Conference on Mononuclear Phagocytes That first meeting led to new nomenclature i e the Mononuclear Phagocytes System MPS which was published in the Bulletin of the World Health Organization R van Furth et al Bull WHO 1972 46 845 852 The paradigm of the MPS has the advantage of being much more consistent than the Reticuloendothelial System RES L Aschoff *Ergebn Inn Med Kinderheilk* 1924 26 1 because cells with similar characteristics can be classified in the same category The essence of a new concept is according to Popper that it must be susceptible to falsification This has been attempted several times for the MPS by those who adhere to the RES However in biology no one can be certain of truth Any theory must be based on experimental observations and or theoretical considerations and both should be presented in such a way that others can try to refute it then or later One may have a theoretical or a pragmatic preference for a theory which at a given time is regarded as possibly true but later it may be shown to be false In other words what we present in this volume is regarded as true at this moment but others may consider it as not true and try to disprove it Controversies often stimulate new research
