Ragel, Nileshsingh V. Thakur, 2021-07-26 This book contains the best selected research papers presented at ICTCS 2020 Fifth International Conference on Information and Communication Technology for Competitive Strategies. The conference was held at Jaipur, Rajasthan, India, during 11-12 December 2020. The book covers state of the art as well as emerging topics pertaining to ICT and effective strategies for its implementation for engineering and managerial applications. This book contains papers mainly focused on ICT for computation, algorithms and data analytics and IT security **Smart Grids for Smart Cities, Volume 1** O. V. Gnana Swathika, K. Karthikeyan, Sanjeevikumar Padmanaban, 2023-07-05 SMART GRIDS for SMART CITIES. Written and edited by a team of experts in the field, this first volume in a two-volume set focuses on an interdisciplinary perspective on the financial, environmental and other benefits of smart grid technologies and solutions for smart cities. What makes a regular electric grid a smart grid? It comes down to digital technologies that enable two-way communication between a utility and its customers as opposed to the traditional electric grid where power flows in one direction. Based on statistics and available research, smart grids globally attract the largest investment venues in smart cities. Smart grids and city buildings that are connected in smart cities contribute to significant financial savings and improve the economy. The smart grid has many components including controls, computers, automation and new technologies and equipment working together. These technologies cooperate with the electrical grid to respond digitally to our quickly changing electric demand. The investment in smart grid technology also has certain challenges. The interconnected feature of smart grids is valuable but it tremendously increases their susceptibility to threats. It is crucial to secure smart grids wherein many technologies are employed to increase real-time situational awareness and the ability to support renewables as well as system automation to increase the reliability, efficiency and safety of the electric grid. This exciting new volume covers all of these technologies including the basic concepts and the problems and solutions involved with the practical applications in the real world. Whether for the veteran engineer or scientist, the student or a manager or other technician working in the field, this volume is a must-have for any library **ICSED TI 2022**

Herve Boileau, Lu Wen Feng, Lauric Garbuio, Hilfi Pardi, 2023-01-16 This book is the proceeding of the International Conference on Sustainable Engineering Development and Technological Innovation ICSEDTI 2022 that was successfully held on 11-13 October 2022 using an hybrid platform. The conference is themed Sustainable empowerment of innovative solutions through the development of integrated scientific researches to enhance the advanced technological world which represents our belief of how the sustainability is essential in our approach to solve problems through technological innovation. A total of 56 papers were submitted and presented within the sessions of the conference. The papers topics revolve around Informatics Technology, Electrical Technology, Marine Technology, Manufacturing System and Technology, Mechanical Engineering, and also Information Industry and Management. In addition to the technical paper presentations, there were also five keynote speeches featured and eight plenary talks were delivered. Two of the keynote speeches were delivered in person by Professor Selo from Universitas Gajah Mada Indonesia and Professor Goib Wiranto from the National Research and Innovation Agency Indonesia. The rest of the keynote speeches were delivered online by Professor Yvon Kermarrec from IMT Atlantique France, Professor Ian Gibson from University of Twente Netherlands, and Dr Ilham Akbar Habibie from The Association of Indonesian Engineer Indonesia. It was a great pleasure to work with the technical program committee led by Mr Hilfi Pardi who have completed the imperative process of peer review on the technical papers submitted in this conference. We are also very fortunate to have on our side the excellent organizing committee team of the Faculty of Engineering of UMRAH who work very hard to organize and support the conference. Finally, our appreciation to all the authors who have participated in this conference with their amazing achievements and enthusiasm. We firmly believe that ICSEDTI is a suitable platform for researchers, engineers, and developers who are concerned with sustainability in engineering and technological development. We hope in the coming years ICSEDTI will be better in terms of the organization of the conference, the quantity, and the quality of the researches submitted, and most importantly the impact on the sustainability of technological innovation.

Based Delta Modulated PMW for Three Phase Inverter Ayu Annur Fetrach Yusoff,2012 One of the PWM schemes proposed for the control of inverters supplying ac drive is Delta Modulation Presently microcomputer has been used as an alternative to the standard Delta Modulation PWM technique Even though the microcomputer is considered as power computing machine their weakness is that to communicate with peripheral equipments they must use specialized circuit added as an external chips By utilizing the features of microcontroller they can just fit inside other device like the inverter or other appliance and also they does not need any other specialize external component for its application The microcontroller

based delta modulated PWM for 3 phase inverter has been proposed in this project in order to get better solution for the control of inverter The simulation of Delta Modulation techniques is carried out using PROTEUS ISIS 7 0 in order to get six modes of delta modulated PWM switching scheme Then the microcontroller PIC18F4550 circuitry to generate Delta PWM is assembled The circuit from the simulation can produce the necessary Delta PWM signal to control the inverter *IETE Technical Review* ,2000 Standard Handbook for Electrical Engineers Donald Fink,H.
