Ai Overview 2025:

AI Success Beyond Perfect Data Dr. M. Maruf Hossain, 2025-12-06 DESCRIPTION AI has become the cornerstone of innovation in modern enterprises. However, the common misconception that perfect data is a prerequisite often stalls initiatives. This book challenges that narrative, proving that AI success is possible even with messy, incomplete, or evolving data landscapes. The book offers a comprehensive roadmap for leveraging data science automation and generative AI. It begins with the principles of data science excellence, addressing how to extract value and insights from existing data. It then addresses automation, the deployment of ethical AI, and team leadership. Finally, it explores generative AI, such as its business potential, limitations, and how to balance LLMs with traditional AI techniques. Practical frameworks, real-world case studies, and success metrics are woven throughout the text. By the end of this book, readers will have a clear, actionable strategy to drive measurable AI outcomes regardless of their current data maturity. This guide empowers leaders to drive innovation and business transformation through AI.

WHAT YOU WILL LEARN

- Learn how to implement AI without perfect data quality.
- Discover practical frameworks to overcome organizational silos.
- Examine the ethical implications of automation and generative AI.
- Gain leadership insights to structure and scale data science teams.
- Balance predictive AI with LLMs for real results.

WHO THIS BOOK IS FOR

This book is for business executives and aspiring data leaders responsible for implementing data-driven strategies and AI in their organizations. It will also benefit data scientists and IT professionals aiming to bridge strategy and execution in enterprise AI adoption.

Charting the Intelligence Frontiers - Edge AI Systems Nexus

Ovidiu Vermesan, Alain Pagani, Paolo Meloni, 2026-01-27

We are witnessing a fundamental shift in the computing landscape, a paradigm shift where intelligence is rapidly migrating to the very edges of the network. This is the era of edge AI, which embeds decision making, perception, and control directly into devices that shape our physical world. This book is a selected collection of the presented work from the European Conference on EDGE AI Technologies and Applications (EEAI) held on 21-23 October 2024 in Cagliari, Sardinia, Italy. The conference is part of a series of annual conferences that delve into the

expanding continuum of micro deep and meta edge architectures which form the backbone of emerging intelligent autonomous systems across numerous sectors From the complexities of advanced algorithms and the design of novel edge AI hardware accelerators to the architecture of next generation communication networks AI frameworks and software systems the EEAI fosters a vibrant exchange of ideas that are following the future and actively defining it From industrial automation to environmental monitoring from manufacturing to smart mobility the expansion of micro deep and meta edge AI processing is propelling a new class of autonomous systems These systems thrive on distributed intelligence leveraging advancements in edge AI hardware architectures accelerators performant algorithms and advanced software frameworks The chapters in this volume celebrate this paradigm shift and offer a glimpse into the vibrant ecosystem shaping the future of edge AI technologies and applications The numerous chapters describe novel solutions and rigorous investigations spanning verification and validation federated learning neuromorphic design scalable architectures sensor fusion and human machine collaboration each chapter demonstrating the innovation wave fuelling Europe's edge AI landscape Together these twenty chapters provide a rich multi layered and deeply insightful perspective on the state of edge AI Each chapter documents the achievements made and highlights the path forward offering a compelling vision of a future where intelligence is seamlessly and securely integrated into the fabric of the real world This book is an essential guide for navigating understanding and contributing to the dynamic and rapidly evolving field of edge AI The real value of this book lies in its innovative forward looking perspective offering a guided exploration of the latest scientific breakthroughs and practical advancements shaping intelligent systems at the edge For researchers students practitioners and visionaries this book provides a comprehensive roadmap for the next stage in the evolution of intelligent connected systems at the edge *Artificial Intelligence and Crime*

The artificial author explores the theme of intellectual property in the era of generative artificial intelligence and reflects on the new concept of creativity brought by this disruptive technology. The book questions the concept of authorship and the possibility that machines might perform much of the creative work traditionally reserved for humans, leaving the latter in the mere role of controller of the outputs obtained. Through an interesting doctrinal reflection, a precise commentary on jurisprudential cases and a detailed survey of the terms of use of the main platforms, Simone Aliprandi offers an overview of the main emerging issues regarding copyright management of AI generated works. The book is written in an accessible style and is intended not only for legal professionals but for all those interested in the new challenges posed by artificial intelligence in the field of creativity. The work is completed by a series of explanatory diagrams and an extensive bibliography.

Reader Bot Naomi S. Baron, 2026-01-20. What happens to human reading when AI bots can do it for us. Explosive developments in artificial intelligence have awed everyday users with the technology's ability to draw on computer coding and especially to write. Those AI generated essays and poems, legal briefs and responses to requests for information are all visible evidence of large language models at work. What we don't see is the critical prior step before it can write: AI needs to read. While AI's written outcomes are remarkably similar to what a diligent student, lawyer or researcher might produce, AI doesn't read the way that humans do. Now that AI is proving an adept reader, what happens to our own reading skills and motivations especially at a time when both voluntary and school reading are increasingly on the decline? We have learned that when we let chatbots write for us, there are pros and cons to handing over our virtual pens. It's critical that we also think through the consequences of relinquishing reading, a deeply human activity, to bots. What do we stand to gain and lose when we let AI read for us? Tracing the intersecting trajectories of AI and reading, Reader Bot tackles this vital question, revealing why we must be thoughtful about how we welcome AI as reader into our lives.

Reimagining Government Faisal Hoque, Erik Nelson, Thomas H. Davenport, 2026-01-06. How AI can help the government lead with speed, trust and impact. Artificial Intelligence is reshaping what is possible across every sector and public service is no exception. Reimagining Government is a bold practical playbook for harnessing AI to deliver smarter, faster and more effective outcomes. Inside, you'll find clear breakdowns of AI opportunities and challenges in the government space. Proven frameworks and maturity models for responsible, scalable adoption. Insights and examples from real world government innovators. Strategies to transform leadership culture and public impact. Written for policymakers, technologists and civic leaders, this book is a guide to making AI work for people as well as for systems.
