That Will Never Work Marc Randolph,2019-09-17 In the tradition of Phil Knight s Shoe Dog comes the incredible untold story of how Netflix went from concept to company all revealed by co founder and first CEO Marc Randolph Once upon a time brick and mortar video stores were king Late fees were ubiquitous video streaming unheard of and widespread DVD adoption seemed about as imminent as flying cars Indeed these were the

widely accepted laws of the land in 1997 when Marc Randolph had an idea. It was a simple thought leveraging the internet to rent movies and was just one of many more and far worse proposals like personalized baseball bats and a shampoo delivery service that Randolph would pitch to his business partner Reed Hastings on their commute to work each morning. But Hastings was intrigued and the pair with Hastings as the primary investor and Randolph as the CEO founded a company. Now with over 150 million subscribers, Netflix's triumph feels inevitable, but the twenty-first century's most disruptive start-up began with few believers and calamity at every turn. From having to pitch his own mother on being an early investor to the motel conference room that served as a first office to server crashes on launch day to the now infamous meeting when Netflix brass pitched Blockbuster to acquire them, Marc Randolph's transformational journey exemplifies how anyone with grit, gut instincts, and determination can change the world even with an idea that many think will never work. What emerges though isn't just the inside story of one of the world's most iconic companies. Full of counterintuitive concepts and written in binge-worthy prose, it answers some of our most fundamental questions about taking that leap of faith in business or in life. How do you begin? How do you weather disappointment and failure? How do you deal with success? What even is success? From idea generation to team building to knowing when it's time to let go, *That Will Never Work* is not only the ultimate follow your dreams parable but also one of the most dramatic and insightful entrepreneurial stories of our time.

The Cold Start Problem Andrew Chen, 2021-12-07 A startup executive and investor draws on expertise developed at the premier venture capital firm Andreessen Horowitz and as an executive at Uber to address how tech's most successful products have solved the dreaded cold start problem by leveraging network effects to launch and scale toward billions of users. Although software has become easier to build, launching and scaling new products and services remains difficult. Startups face daunting challenges entering the technology ecosystem, including stiff competition, copycats, and ineffective marketing channels. Teams launching new products must consider the advantages of the network effect, where a product or service's value increases as more users engage with it. Apple, Google, Microsoft, and other tech giants utilize network effects, and most tech products incorporate them, whether they're messaging apps, workplace collaboration tools, or marketplaces. Network effects provide a path for fledgling products to break through, attracting new users through viral growth and word of mouth. Yet most entrepreneurs lack the vocabulary and context to describe them, much less understand the fundamental principles that drive the effect. What exactly are network effects? How do teams create and build them into their products? How do products compete in a market where every player has them? Andrew Chen draws on his experience and on interviews with the CEOs and founding teams of LinkedIn, Twitch, Zoom, Dropbox, Tinder, Uber, Airbnb, and Pinterest to offer unique insights in answering these questions. Chen also provides practical frameworks and principles that can be applied across products and industries. *The Cold Start Problem* reveals what makes winning networks thrive, why some startups fail to successfully scale, and most crucially, why products that create and compete using the network effect are vitally important today. **The**
