Sooner Safer Happier Jonathan Smart, 2020-11-10

This is one of the most important Agile books since *The Phoenix Project*. Charles Betz, Principle Analyst, Forrester Research.

It's no secret that we are living in the Digital Age. Technology companies make up seven of the world's ten largest firms by market capitalization. And the key to their success is the key to all modern organizations. Jonathan Smart, business agility practitioner, thought leader and coach, reveals the patterns and antipatterns that will help organizations from every industry deliver better value, sooner, safer and happier through high levels of engagement, inclusion and empowerment. Through his decades of experience in the technology world, Smart provides business leaders with a blueprint for creating a world class organization of the future. Through Agile and Lean ways of working, business leaders can empower teams to improve production, grow together and create better services for their customers. These better ways of working have overflowed from the IT department to every corner of successful organizations, taking root in every industry from aerospace to accounting, insurance to shipping. This book is not about software development. It is not a book about the computer industry. This book is about applying agility across the entire organization. It's a book that will put you at the front of change and ahead of the competition. A true business wide perspective on Digital Transformation and the need for whole business agility.

Adam Banks, Non Executive Director and Former CTIO of AP Moller Maersk.

Note from the Authors: Purchases will result in the planting of trees and empowerment of women in countries with the lowest scores on the IUCN's gender and environment index. It's not just carbon neutral, purchases in any format will result in an average 10x greater carbon offset.

Mastering Disruption Ganesh Krishnan, 2025-01-30

The need for this book is driven by the rapid pace of change and innovation in the business world. Traditional business models and strategies that may have worked in the past are no longer as effective, and new technologies and emerging trends are constantly disrupting the industry. To stay ahead of the curve and remain competitive in the modern business world, it is critical to gain a deep understanding of new business models and strategies that can help businesses

succeed Not only businesses but also working professionals need to stay up to date with the latest trends and best practices in management and business and to adapt to the rapidly changing landscape of the industry The book provides new insights knowledge and a framework to help readers navigate the changes likely to come at a much faster pace thanks to disruptive technology Read this book to position yourself for success in a rapidly changing world and stay ahead of the curve

Telling Stories with Data Rohan Alexander,2023-07-27 The book equips students with the end to end skills needed to do data science That means gathering cleaning preparing and sharing data then using statistical models to analyse data writing about the results of those models drawing conclusions from them and finally using the cloud to put a model into production all done in a reproducible way At the moment there are a lot of books that teach data science but most of them assume that you already have the data This book fills that gap by detailing how to go about gathering datasets cleaning and preparing them before analysing them There are also a lot of books that teach statistical modelling but few of them teach how to communicate the results of the models and how they help us learn about the world Very few data science textbooks cover ethics and most of those that do have a token ethics chapter Finally reproducibility is not often emphasised in data science books This book is based around a straight forward workflow conducted in an ethical and reproducible way gather data prepare data analyse data and communicate those findings This book will achieve the goals by working through extensive case studies in terms of gathering and preparing data and integrating ethics throughout It is specifically designed around teaching how to write about the data and models so aspects such as writing are explicitly covered And finally the use of GitHub and the open source statistical language R are built in throughout the book Key Features Extensive code examples Ethics integrated throughout Reproducibility integrated throughout Focus on data gathering messy data and cleaning data Extensive formative assessment throughout
