Moundbuilders of the Amazon Anna Curtenius Roosevelt, 1991 Moundbuilders of the Amazon shows that sophisticated archaeological bioarchaeological and geophysical techniques of remote sensing are fully applicable to tropical sites Additionally the comprehensive use of such techniques by all archaeologists doing fieldwork anywhere could revolutionize archaeology allowing archaeologists to look inside sites rather than simply excavate them Using a variety of remote sensing techniques Roosevelt documents the existence of a major moundbuilding culture possessing monumental architecture and a rich artistic tradition on the lowland tropical floodplain of Marajo Island at the mouth of the Amazon River in Brazil from about 400 A D to about 1 300 A D Marajo Island at the mouth of the Amazon River is about the same size as Switzerland or Belgium A well developed civilization existed there from about 400 A D to 1 300 A D comparable in many ways to the Inca civilization to the west or to the Aztec and Maya cultures to the north or in some interesting ways to the Pharonic cultures which developed at the mouth of the Nile Because this civilization had no stone at its disposal it expressed its monumental architecture in packed dirt which washed back into the alluvial floodplain long ago effectively preventing archaeological discovery until the recent development of sophisticated techniques of remote sensing and reconstruction Key Features Reports on the most extensive stratigraphic excavations ever of an ancient Amazonian civilization adapted to a floodplain environment Introduces the first use of geophysics for archaeology in non specialized language Illustrates for the first time the elaborate art of a complex society that was indigenous to the tropical lowlands Describes monumental sites rich polychrome pottery and the first extensive biological remains ever recovered in an Amazonian site Proves that sophisticated archaeological bioarchaeological and geophysical techniques of remote sensing are fully applicable to tropical sites Shows that the comprehensive use of such methods could revolutionize archaeology by allowing archaeologists to look inside sites rather than simply excavate them Provides examples which prove that the theories about the limitations of the tropical environment for cultural evolution are simply untrue and were based on faulty knowledge of the region and its archaeology

The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and suspenseful novel that will keep you guessing until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
