[Engaging Families as Children's First Mathematics Educators](#) Sivanesh Phillipson,Ann Gervasoni,Peter Sullivan,2016-11-21 This book explores how professionals can engage and inspire parents to support their young children s mathematics learning Bringing together international experts researchers and scholars it proposes a framework for engaging with and supporting parents including those who are

less aware of the crucial development of children's mathematical skills in the early years. Focusing on mathematics learning from birth to 5 years the book's underlying assumption is that it is possible to offer guidance to professionals working with families with young children concerning how to engage and support families in the area of mathematics learning including those families who seem alienated from education services. Specifically the respective chapters present a framework for understanding children's early mathematical development and the important role of families in this regard. They describe effective strategies for engaging families in their children's mathematics learning including those who are marginalised and experience multiple disadvantages so that all families can best support their children's mathematical learning and their development of positive attitudes towards learning. In closing hurdles and opportunities within the systems surrounding family engagement are addressed.

Managing Student Behavior Marsha Costello, 2022-04-20 **Managing Student Behavior** provides an in depth understanding of student behavior including identifying factors that trigger and maintain negative disruptive actions and attitudes. It provides an overview of appropriate reinforcement which is fundamental in making positive behavior changes and highlights many effective evidence based strategies that support permanent change. Real life examples and anecdotes throughout the book illustrate a variety of classroom challenges as well as strategies used to support positive change in each scenario. The author uses a conversational approach to connect with readers and provide a non threatening environment in which to learn the basics of behavior and behavioral change.
