results of the author's wide observation and they fairly represent the best teaching in American schools. There is a great advantage in studying these several subjects in the order of their logical dependence and an effort has been made to present psychical processes that can be understood by anyone who is competent to teach English grammar. Experience uniformly shows that a knowledge of methods of teaching can be successfully applied only in the clear light of the principles which they embody and hence the essential thing for the teacher is to obtain a clear knowledge of the guiding principles of their art.

*Media Libraries in an Age of Unending Consumption* Mike Van Esler, 2023-10-24 As the home video market upended traditional film industry models, media libraries emerged as important sources of ancillary revenue. The inflection point for media library exploitation came in 2007 when Netflix launched its streaming service, relying on extensive licensing of film and television libraries to grow its subscriber base. In this book, Mike Van Esler examines how media libraries and business models have evolved since the home video era, with particular emphasis placed on the streaming age of the past fifteen years. Van Esler argues that media libraries have grown beyond their usages from the pre-home video era to become central to today's corporate media strategy. By studying the ways in which media library exploitation has scaled up since the turn of the new millennium, the author identifies insights into larger media industry trends. Ultimately, this book explores the intersection of corporate media, independent distributors, private equity tech companies, and audiences. Scholars of media studies, business, and sociology will find this book of particular interest.

The Responsible Business Process Management RBPM Forum provides a platform for exploring how to integrate responsibility into BPM practices, addressing challenges from three perspectives: technological, managerial, and conceptual. The Process Technology Forum covers technical and engineering aspects related to the study, design, development, and maintenance of software systems that support the modeling, simulation, analysis, enactment, and monitoring of business processes. The Educators Forum deals with possibilities to improve BPM teaching in a dynamic and practice-oriented way. The total of 32 papers included in this book was carefully reviewed and selected from a total of 65 papers submitted to these forums.
