States, Markets and Wars in Global History Giulio Sapelli, 2023-09-30 This wide ranging book focuses on the economic and political changes that have taken place between the advent of globalization and the COVID 19 pandemic and assesses how this may bring about a profound reconfiguration of the global political system Sapelli considers a range of developments in different spheres from international to national politics military aggressions and worldwide political trends such as the rise of populism to illuminate the moment of neoliberal crisis in which we now live He argues that Europe and its institutions in particular no longer demonstrate a model of diplomacy and statesmanship with the rise of technocratic structures and elitism reflecting how an ideal of global convergence towards liberalism and democracy no longer holds true The book then considers how a new international order based on the reason of state can be brought about by global cooperation between the US Russia and China along with a return to properly regulated finance and a renewed focus on community in the wake of the coronavirus pandemic The book will be of interest to those working in international economics and international relations as well as academics of economic history and political economy
