**Organizational Semiotics** Louise Ravelli, Theo van Leeuwen, Markus A. Höllerer, Dennis Jancsary, 2023-05-17 This edited volume brings together two largely separate fields organization studies and multimodal social semiotics to develop an integrated research agenda for the novel interdisciplinary field of organizational semiotics. Organizations whether for profit non profit or governmental dominate much of everyday life and multimodal communication is not only an output of organizations but is also constitutive of them. This volume argues in particular for the importance of organization studies for social semioticians not just as a site of application but also as a critical contemporary context that requires novel and expanded methods of analysis and critique and new practices of partnership. The volume addresses a range of institutions and sectors from civil to retail to medical from corporations to universities and reveals how a deep engagement with their meaning making practices produces insights not just about communication but also about the broader contemporary cultural context in which organizations play such a significant role. Fundamentally it reveals that the rich analytical and theoretical resources of multimodal perspectives on organizations studies can and should make a fundamental contribution to our understanding of organizations in social life. This volume is relevant to social semioticians and organizational researchers as well as to practitioners and decision makers in organizations.
