All the Dangerous Things Stacy Willingham, 2023-01-10 Following up her instant New York Times bestseller *A Flicker in the Dark*, Stacy Willingham delivers a totally gripping thriller about a desperate mother with a troubled past. In *All the Dangerous Things*, one year ago Isabelle Drake's life changed forever: her toddler son Mason was taken out of his crib in the middle of the night while she and her husband were asleep in the next room. With little evidence and few leads for the police to chase, the case quickly went cold. However, Isabelle cannot rest until Mason is returned to her. Literally. Except for the occasional catnap or small blackout where she loses track of time, she hasn't slept in a year. Isabelle's entire existence now revolves around finding him, but she knows she can't go on this way forever. In hopes of jarring loose a new witness or buried clue, she agrees to be interviewed by a true crime podcaster, but his interest in Isabelle's past makes her nervous. His incessant questioning paired with her severe insomnia has brought up uncomfortable memories from her own childhood, making Isabelle start to doubt her recollection of the night of Mason's disappearance as well as her second guess who she can trust, including herself. But she is determined to figure out the truth, no matter where it leads.

Akbaz, 2018-10-03 Abstract A book's success/popularity depends on various parameters: extrinsic and intrinsic. In this paper, we study how the book-reading characteristics might influence the popularity of a book. Towards this objective, we perform a cross-platform study of Goodreads entities and attempt to establish the connection between various Goodreads entities and the popular books/Amazon best sellers. We analyse the collective reading behaviour on the Goodreads platform and quantify various characteristic features of the Goodreads entities to identify differences between these Amazon best sellers (ABS) and the other non-best-selling books. We then develop a prediction model using the characteristic features to predict if a book shall become a best seller after one month/15 days since its publication. On a balanced set, we are able to achieve a very high average accuracy of 88.72% (85.66% for the prediction where the other competitive class contains books which are randomly selected from the Goodreads dataset). Our method, primarily based on features derived from user posts and genre-related characteristic properties, achieves an improvement of 16.4% over the traditional popularity factors (ratings, reviews) based baseline methods. We also evaluate our model with two more competitive sets of books: (a) those that are both highly rated and have received a large number of reviews but are not best sellers (HRHR) and (b) Goodreads Choice Awards Nominated books which are non-best sellers (GCAN). We are able to achieve quite good results with very high average accuracy of 87.1% and as well as high ROC for ABS vs GCAN. For ABS vs HRHR, our model yields a high average accuracy of 86.22%. You have to take life for granted; the artist thinks the whole thing sunrises and slow Sunday mornings and water balloons and another person's breath against your neck. That's the only courageous thing a person can do. In the corner of a world-famous painting, three tiny figures sit on the end of a pier, a secret hidden in plain sight. Twenty-five years ago, a group of teenagers found solace in each other during one unforgettable summer. Their friendship inspired a transcendent work of art, a painting that now mysteriously belongs to eighteen-year-old aspiring artist Louisa. Driven to learn the story behind its creation, Louisa embarks on a journey to the seaside town where it all began. But as she gets closer to the painting's birthplace, Louisa learns that happy endings do not always take the form we expect.
