Raffael Buff,2016-12 Streaming problems are algorithmic problems that are mainly characterized by their massive input streams Because of these data streams the algorithms for these problems are forced to be space efficient as the input stream length generally exceeds the available storage The goal of this study is to analyze the impact of additional information more specifically a hypothesis of the solution on the algorithmic space complexities of several streaming problems To this end different streaming problems are analyzed and compared The two problems most frequent item and number of distinct items with many configurations of different result accuracies and probabilities are deeply studied Both lower and upper bounds for the space and time complexity for deterministic and probabilistic environments are analyzed with respect to possible improvements due to additional information The general solution search problem is compared to the decision problem where a solution hypothesis has to be satisfied **Computational Logistics** Joachim R. web sep 6 2023 friction stir welding is not only a solid state joining method used mostly for metals and alloys but also used for joining various polymer materials this literature review includes information about the process parameters joint integrity and mechanical properties of fsw welded joints

friction stir welding kuka ag - Feb 08 2023

web friction stir welding is the optimal joining process for non ferrous metals with a low melting temperature and for mixed metal combinations friction stir welding fsw the process friction stir welding is a process in which a rotating pin is traversed along the contact surfaces between the workpieces

friction stir welding twi - Mar 09 2023

web friction stir welding fsw is a solid state joining process developed at twi ltd in 1991 fsw works by using a non consumable tool which is rotated and plunged into the interface of two workpieces the tool is then moved through the interface and the frictional heat causes the material to heat and soften
