Must Inclusion be Special? Jonathan Rix, 2015-06-05 *Must Inclusion be Special* examines the discord between special and inclusive education and why this discord can only be resolved when wider inequalities within mainstream education are confronted. It calls for a shift in our approach to provision from seeing it as a conglomeration of individualised needs to identifying it as a conglomeration of collective needs. The author examines the political, medical and cultural tendency of current times to focus upon the individual and contrasts this with the necessity to focus on context. This book distinguishes the theoretical perspectives that are often associated with special or inclusive education and the broad range of interests which depend upon their ongoing development. This examination leads to a problematisation of mainstream education provision, our understanding of why social inequities emerge and how additional support can overcome these inequities. Further chapters explore the underlying challenges which emerge from our use and understanding of the notions of special and inclusive, outlining an alternative approach based upon a community of provision. This approach recognises the interconnectedness of services and the significance of context and it encapsulates the aspiration of much international legislation for participation and inclusion for all. But it also assumes that we tend towards diffuse practices, services, policies, settings and roles spread across provision which is variously inclusive and exclusionary. In seeking to create equitable participation for all, support needs to shift its focus from the individual to this diffuse network of contexts. *Must Inclusion be Special* emerges from the research base which problematises inclusion and special education, drawing upon examples from many countries. It also refers to the author's research into pedagogy, language and policy and his experiences as a teacher and the parent of a child identified with special educational needs.
