*Assessment for Reading Instruction* Katherine A. Dougherty Stahl, Kevin Flanigan, Michael C. McKenna, 2019-12-09 This book provides a comprehensive conceptual framework and hands on practical tools for reading assessment. The authors present a clear roadmap for evaluating K-8 students' strengths and weaknesses in each of the basic competencies that good readers need to master. Teachers learn how to select, administer, and interpret a wide range of formal and informal assessments and how to use the results to improve instruction. In a large size format for easy photocopying, the book includes 30 reproducible assessment tools.

Provided by publisher **JEBPS Vol 6-N1** *Journal of Evidence-Based Practices for Schools*, 2005-02-15 The *Journal of Evidence-Based Practices for Schools* is a leader in publishing research to practice articles for educators and school psychologists. The mission of this journal is to positively influence the daily practice of school-based professionals through studies demonstrating successful research-based practices in educational settings. As a result, the editors are committed to publishing articles with an eye toward improving student performance and outcomes by advancing psychological and educational practices in the schools. They seek articles using non-technical language that 1. outline an evidence-based practice, 2. describe the literature supporting the effectiveness and theoretical underpinnings of the practice, 3. describe the findings of a study in which the practice was implemented in an educational setting, and 4. provide readers with information they need to implement the practice in their own schools in a section entitled *Implementation Guidelines*. The *Journal of Evidence-Based Practices for Schools* differs from other scholarly journals in that it features articles that demonstrate empirically based procedures for readers to apply the practice in their setting.

**Reading Assessment in an RTI Framework** Katherine A. Dougherty Stahl, Michael C. McKenna, 2012-01-01 The importance of Response to Intervention has never been clearer. We strongly believe that RTI, when fully implemented, represents our best hope of building the kind of schoolwide framework necessary for making truly informed choices about the type and intensity of the reading instruction children receive. Our goal for this book is to offer the guidance needed to use these and other tools in an RTI framework. This is a book about the assessment component of RTI. We offer guidance and tools for gathering the information needed in an RTI framework. We have tried our best to write a book that is both practical and specific, that reflects both research and common sense, that is consistent with standards, and that affords guidance in the issues central to RTI.

**The Reading Teacher**, 1982 **Television and the Exceptional Child** Joyce Sprafkin, Kenneth D. Gadow, Robert Abelman, 2013-10-23 The question of what types of children are most influenced by or can best benefit from television is a recurrent theme in the scientific literature as well as a frequently raised issue for pediatric associations, educators, and parent/citizen groups concerned about the welfare and advancement of young children. To effectively address this question, this book focuses on a wide variety of children with highly divergent cognitive abilities, social skills, and educational capacities that are often labeled as emotionally disturbed, learning disabled, mentally retarded, and intellectually gifted. These children not only possess

characteristics that place them at the greatest risk with regard to television's negative impact but also in a position to most benefit from the purposeful use of the medium at home and in the classroom. Combining literature from the fields of mass communication, developmental psychology and special education, the authors present a comprehensive analysis of television and its forgotten audience. Practical implications and applications in the home and school are also extracted from research findings, making this volume a valuable resource for students, educators and researchers in the fields of communication and special education, and for the parents and teachers of exceptional children.
