Soul Of A New Machine:

The Soul of A New Machine Tracy Kidder, 2011-08-23 Tracy Kidder's riveting Washington Post story of one company's efforts to bring a new microcomputer to market won both the Pulitzer Prize and the National Book Award and has become essential reading for understanding the history of the American tech industry. Computers have changed since 1981 when *The Soul of a New Machine* first examined the culture of the computer revolution. What has not changed is the feverish pace of the high tech industry, the go for broke approach to business that has caused so many computer companies to win big or go belly up, and the cult of pursuing mind bending technological innovations. *The Soul of a New Machine* is an essential chapter in the history of the machine that revolutionized the world in the twentieth century. Fascinating. A surprisingly gripping account of people at work. Wall Street Journal. *Analytical Frameworks, Applications, and Impacts of ICT and Actor-Network Theory* Spöhrer, Markus, 2018-10-05 In a globalized world one of the most prominent developments in technology has been the advancement of non human entities. The applications of these entities in media as well as other fields of science have been looked upon as irrelevant for understanding human agency. *Analytical Frameworks Applications and Impacts of ICT and Actor Network Theory* provides innovative insights into human and non human roles e.g. physical objects, technology, animals, or even beliefs, scientific facts or discourses and their influence on this theory and to each other. The content within this publication represents the work of consumer culture, technology and the arts. It is designed for researchers, students and professionals as it covers topics centered on a multidisciplinary reading of actor network theory for a variety of fields. Crisscrossing Borders in Literature of the American West R. Dyck, C. Reutter, 2009-03-02 In one consequential volume *Crisscrossing Borders in Literature of the American West* presents the cross section of a fast changing and greatly expanded field. Through interdisciplinary essays this volume on the post national West challenges the idea of a unified national story sustained by strategic exclusions. Contributors analyze the economic and environmental exploitation depicted in working class Western literature, emphasize the transnational by approaching both the North-South and cross Atlantic axes, grapple with the role of Mormons and dissect the new masculinity of Silicon Gunslingers. Each essay successfully and compellingly models a new and fruitful way of engaging the West. *Computerworld*, 1981-08-17 For more than 40 years *Computerworld* has been the leading source of technology news and information for IT influencers worldwide. *Computerworld's* award winning Web site, *Computerworld.com*, twice monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network. **Constructing Rhetorical Education** Davida Charney, Wilma R. Ebbitt, 1992 In nineteen essays illustrating its many aspects, this book offers an argument for what it takes to construct a complete rhetorical education. The editors take an approach that is pragmatic and pluralistic based as it is on the assumptions that a rhetorical education is not limited to teaching freshman composition or any specific writing course and that the contexts in which such an education occurs are not limited to classrooms. This thought provoking volume

stresses that while a rhetorical education results in the growth of writing skills its larger goal is to foster critical thinking
