*A Clinician's Guide to Gender-Affirming Care* Sand C. Chang, Anneliese A. Singh, Lore M. Dickey, 2018-12-01 Transgender and gender nonconforming TNGC clients have complex mental health concerns and are more likely than ever to seek out treatment. This comprehensive resource outlines the latest research and recommendations to provide you with the requisite knowledge, skills, and awareness to treat TNGC clients with competent and affirming care. As you know, TNGC clients have different needs based on who they are in relation to the world. Written by three psychologists who specialize in working with the TGNC population, this important book draws on the perspective that there is no one size fits all approach for working with TNGC clients. It offers interventions tailored to developmental stages and situational factors for example cultural intersections such as race, class, and religion. This book provides up to date information on language, etiquette, and appropriate communication and conduct in treating TGNC clients and discusses the history, cultural context, and ethical and legal issues that can arise in working with gender diverse individuals in a clinical setting. You'll also find information about informed consent approaches that call for a shift in the role of the mental health provider in the position of assessment and referral for the purposes of gender affirming medical care such as hormones, surgery, and other procedures. As changes in recent transgender health care and insurance coverage have provided increased access for a broader range of consumers, it is essential to understand transgender and gender nonconforming clients' different needs. This book provides practical exercises and skills you can use to help TNGC clients thrive.

Transgender Health and HIV Prevention Walter O. Bockting, Eric Avery, 2006-01-04 Get the latest assessment of the health needs of the transgender population. The impact of the HIV/AIDS epidemic on the transgender community has been tragically ignored and, as yet, there is surprisingly little research data on the subject of health care and HIV prevention in this marginalized population. Transgender Health and HIV Prevention fills this void by providing a groundbreaking empirical assessment of the health needs of transgender persons in several areas around the United States. Respected experts discuss issues that hinder the effectiveness of HIV prevention programs including housing, mental health, and employment as well as the unique broader problems of social stigma, discrimination, and the lack of transgender knowledge and sensitivity on the part of health providers and prevention workers. Even though recent studies show estimated HIV infection rates to be as much as 60 percent among specific transgender populations in the United States, the transgender community continues to receive inadequate healthcare support. Transgender Health and HIV Prevention tackles the problems inherent in the healthcare system by first assessing the needs of transgender persons then offering specific practical recommendations for remedy. Top researchers in partnership with community members in San Francisco, Houston, Washington DC, Chicago, Boston, Philadelphia, New England, San Juan, and Minneapolis-St. Paul bring empirical data together to assess what has to be done to effectively stem the HIV epidemic. This essential resource is extensively referenced with several tables to clarify data.
