## PERFORMANCE TASK

**SCIENCE LAB DESIGN CRITERIA**

A basic science lab needs to be designed with the intent of the science lab in mind. In the following, the following is a list of rules and requirements for the science lab.

**Design the floor**

**Lab table**

After printing out all three of the floor plans from the table above, you will determine the placement of the 10' x 10' table for transforming the 10' x 10' floor. Be sure to record the answers in the provided boxes.

- 1. There must be 2' of space there.
- 2. One floor must be transformed.
- 3. One floor must be reflected.
- 4. One floor must be rotated.
- 5. One floor must be dilated.
- 6. The table must be placed along the wall for the planning.
- 7. Geometric shapes must be placed along the wall by the floor for easier.

## Transformations Performance Task:

**Performance Tasks and Rubrics for Middle School Mathematics** Charlotte Danielson,Elizabeth Marquez,2016-03-02 Performance tasks are highly effective tools to assist you in implementing rigorous standards But how do you create evaluate and use such tools In this bestselling book educational experts Charlotte Danielson and Elizabeth Marquez explain how to construct and apply performance tasks to gauge students deeper understanding of mathematical concepts at the middle school level You ll learn how to Evaluate the quality of performance tasks whether you ve written them yourself or found them online Use performance tasks for instructional decision making and to prepare students for summative assessments Create your own performance tasks or adapt pre made tasks to best suit students needs Design and use scoring rubrics to evaluate complex performance tasks Use your students results to communicate more effectively with parents This must have second edition is fully aligned to the Common Core State Standards and assessments and includes a variety of new performance tasks and rubrics along with samples of student work Additionally downloadable student handout versions of all the performance tasks are available as free eResources from our website [www.routledge.com/9781138906914](http://www.routledge.com/9781138906914) so you can easily distribute them to your class

### **Transformation - A Fundamental Idea of Mathematics Education**

Sebastian Rezat,Mathias Hattermann,Andrea Peter-Koop,2013-12-13 The diversity of research domains and theories in the field of mathematics education has been a permanent subject of discussions from the origins of the discipline up to the present On the one hand the diversity is regarded as a resource for rich scientific development on the other hand it gives rise to the often repeated criticism of the discipline s lack of focus and identity As one way of focusing on core issues of the discipline the book seeks to open up a discussion about fundamental ideas in the field of mathematics education that permeate different research domains and perspectives The book addresses transformation as one fundamental idea in mathematics education and examines it from different perspectives Transformations are related to knowledge related to signs and representations of mathematics related to concepts and ideas and related to instruments for the learning of mathematics The book seeks to answer the following questions What do we know about transformations in the different domains What kinds of transformations are crucial How is transformation in each case conceptualized

### Human Performance Models for Computer-Aided Engineering Jerome I. Elkind,Stuart K. Card,Julian

Hochberg,2014-06-28 Human Performance Models for Computer Aided Engineering is a collection of papers that deals with the relationship between scientific theories of human performance and practical engineering This collection describes the emergence of a scientific engineering paradigm that uses computational theories in computational design aids This book also considers computational human factors such as human performance models and their application in computer based engineering designs This text then presents applications of these models to some helicopter flight problems This book also explains the four requirements in programming a computer based model of the sensory performance of a pilot as 1 prediction

capability 2 measurement capability 3 provision of compatible computer algorithms and 4 image driven This collection also describes cognitive structures aspects of the human information processing system This text then discusses resource management and time sharing issues that is related to competition of scarce resources which can be predictive of the quality of information processing This book also describes other modeling scenarios such as those predicting human errors decision making and shape modeling This text can prove valuable for computer programmers engineers physicists and research scientists dealing with psychophysics    **Machine Learning Proceedings 1990** Bruce Porter, Raymond J.

Mooney,2014-05-23 Machine Learning Proceedings 1990    **The Topos of Music II: Performance** Guerino Mazzola,2018-03-28 This is the second volume of the second edition of the now classic book The Topos of Music The author explains his theory of musical performance developed in the language of differential geometry introducing performance vector fields that generalize tempo and intonation The author also shows how Rubato a software platform for composition analysis and performance allows an experimental evaluation of principles of expressive performance theories

*Configurable Software Performance Completions through Higher-Order Model Transformations* Happe, Lucia,2014-11-26  
Chillies is a novel approach for variable model transformations closing the gap between abstract architecture models used for performance prediction and required low level details We enable variability of transformations using chain of generators based on the Higher Order Transformation HOT HOTs target different goals such as template instantiation or transformation composition In addition we discuss state dependent behavior in prediction models and quality of model transformations

Perlmutter,2014-01-14 This volume contains the papers presented at the eighteenth Minnesota Symposia on Child Psychology held October 27 29 1983 at the University of Minnesota Minneapolis As has been the tradition for this annual

series the faculty of the Institute of Child Development invited internationally eminent researchers to present their research and to consider problems of mutual concern to scientists studying development The theme of the eighteenth symposium and the present volume was cognitive perspectives on social and behavior development    *Task Components and Demands as Factors in Dual-Task Performance* Robert Arthur North,1977 This study explored the effects of interference between tasks as related to their specific functional requirements and under changing priorities Four tasks were performed singly and in all pairwise combinations to compare their mutual interference levels The tasks were one dimensional compensatory tracking and three self paced Keyboard response tasks one requiring a transformation by categorizing one requiring storing and responding with the previous stimulus and one requiring no intervening activity between stimulus recognition and response Tracking paired with any of the the three Keyboard tasks was least interfering Tracking and Tracking was moderately interfering and Keyboard Keyboard combinations the most interfering suggesting that qualitatively dissimilar tasks are performed better than functionally similar tasks The Keyboard task requiring continuous storing and response to the previous stimulus was highly disruptive when paired with other Keyboard tasks and showed little evidence of interweaving with them while the transformation Keyboard task was not as disruptive and could be interweaved with itself or the simple Keyboard task
